

## Senior Information Security Analyst

---

Compass IT Compliance, LLC is a leading Information Technology Audit and Compliance firm. Companies large and small must comply with a confusing mix of regulations and laws such as the PCI DSS (Payment Card Industry Data Security Standard), FFIEC, Sarbanes-Oxley, HIPAA / HITECH, Basel II, Gramm-Leach-Bliley Act, Patriot Act, Identity Theft Red Flags, SEC requirements and state privacy laws. Even in today's tough economy, and in the face of rising costs and shrinking staffs, companies must remain a step ahead of these complex compliance requirements.

The practice of IT Audit and Compliance identifies and remediates any violations of these regulations and requirements from both a technical and procedural perspective. It is also a very complex practice that can become costly and time-consuming. To meet strict IT and security guidelines, organizations require independent assistance with:

- Payment Card Industry (PCI) Services
- Compliance Services for Financial Institutions
- Security Assessment Services
- IT Auditing and Risk Assessment Services
- Privacy Regulations Compliance Services
- Business Continuity Planning Services
- Business Continuity Program Portal
- Computer Forensics & Incident Response Services

Compass IT Compliance provides experienced, certified IT Auditors to perform IT audit and compliance work at a lower cost than maintaining internal auditing staff. By outsourcing their IT Audit and Compliance requirements to Compass, organizations save costs while ensuring complete IT compliance by employing objective, certified consultants from an independent and trusted IT leader.

Compass is looking for an experienced Information Security Analyst for a sub-contractor position to assist in meeting the growing need for security services within the business world today. The Sr. Security Analyst would need to be able to work independently as well as part of a team, interact with all levels of client personnel and effectively communicate their efforts and results to organizations technical teams as well as their senior management teams. Regional travel (50%) and some after-hours work required.

### **Sr. Information Security Analyst Job Summary:**
