

PRESS RELEASE

May 2016

SEAtS Software announces the release of their mobile platform. SEAtS Mobile will be included with their forthcoming major SEAt 3.0. update. SEAtS Mobile now includes native apps for iPhone, Android and iPad to complement the existing SEAtS web apps for students, academic and advisory staff.

SEAtS Mobile delivers class schedules along with student attendance tracking by course module. Notifications and escalations can be found in the app inbox. SEAtS Mobile also allows students to make absence requests, record extra-curricular activity, track placements and internships, and notifies students of class changes and cancellations in real time.

Key Benefits

- Class check in through GPS & Bluetooth iBeacons
- Calendar & class schedule display
- Graphical attendance displays by module
- Early warning alerts
- Inbox for messages and alerts

SEAtS Campus Performance Cloud delivers real-time pre-packaged insights into the key metrics that drive success for your university, institute or school. SEAtS gives you the tools to measure the effectiveness of policies and procedures and to make informed decisions to effect change.

SEAtS leverages the rich source of data available and combined them to deliver meaningful metrics to inform the management and governance at every level.
