BiS

iPoint BiS is breaking new ground with its innovative EHS&S platform which provides actionable insights for smarter decisions

CiDER, delivering smart technologies for actionable insights enabling rapid responses for internal & external dynamics

## EHS & Sustainability Data Management with CiDER

### Effortless Decisions for Seamless Sustainability

iPoint BiS helps organisations achieve effortless, transparent insight and intelligent, actionable decisions through a cutting-edge Business Intelligence Platform

#### Taking Analytics Beyond Reporting

Having access to a straightforward and user-friendly EH&S system can significantly increase your business growth. By harnessing the impact of CiDER, you can gain critical insight to base decisions on, and we provide a platform that allows to do just this. CiDER is breaking new ground with its highly intuitive, self-service platform, complete with elegant web services, data visualisations and analytics tools

#### Smart Technology at your Fingertips

Both capital light and rapid time to value, our platform allows you to fully exploit your data to access the best decisions possible. With smarter decisions, performance is maximised, and costs are significantly reduced

#### Beyond Reporting

CiDER goes beyond typical Business Intelligence reporting. With CiDER, you gain access to a platform that will change the way you view and analyse your data. With CiDER, you will gain an intimate understanding of your organisations connections, and relationships as well as gaining actionable insight into dependencies, uncovering cascading impacts and predicting behaviour. Inevitably uncovering new opportunities for improvements

#### The power of CiDER

With CiDER, you gain access to the first tool of its kind in EHS and Sustainability with graph-based technology. Not only is querying quicker and more seamless, but it allows you to interact with your data in new ways; you can now discover how all over your data is connected in real-time. Find relevant and meaningful information in minutes with CiDER's graph technology

#### Our Approach

Our straightforward and highly collaborative approach with our clients starts with us understanding our clients KPIs and aligning their goals and requirements with our platform which will deliver the results they require

### Visualise data relationships

CiDER adds another layer of usability to your existing data and data systems. It visualises your data in ways you've never seen before so that you can discover more. CiDER scales as big or small as you need it to be. And you can change it easily as your business changes. Just the way it should be

### Interact with your data

By naturally representing your organisation, people, activities, products and services, you can ask very human questions of your data. CiDER allows you to explore your data with curiosity, inquisitiveness and by asking why. The more you ask, the more intelligence you will uncover

### Benefits

- Naturally represent your organisation
- Visualise data relationships; not just your data
- Build workflows for real people
- Increase the value of your data

### Features

- Build interactive relationship maps
- Includes content libraries for regulatory frameworks, risk factors, KPIs, emission factors etc.
- Includes human-centric workflows and allows you to build your own

- Uses interview-style queries rather than filters
- Grows as your data grows
- Designed to be so user-friendly, anyone in the organisation can use and understand it within minutes

### Technology

- Utilises cutting-edge graph database technology
- Easily handles millions of data nodes with no performance impact
- 1000 times faster than existing relational databases tools
- Built on an API-core making custom apps easy and quick to build

### CiDER in a Nutshell

With CiDER, your organisation gains a tool which is ultimately a single solution for both EHS and Sustainability Data Management. Some of CiDER's other capabilities include:

- Sustainability Data Analysis & Reporting
- EHS Data Management
- Mapping complex Enterprise Structures
- Mapping the entire Supply Chain
- Supply Chain Sustainability Analysis

iPoint BiS is your reliable partner for EHS and Sustainability Software and Data Management. Create business value with our market-leading platform, CiDER, and take your analytics beyond reporting.
