

CONTRACTOR CREDENTIALING

STREAMLINE YOUR CREDENTIALING PROCESS

Security and assurance. Safety and compliance. These are just a few reasons why contractor credentialing is such an essential part of your facility's compliance program.

Contractor Credentialing from symplr is the easiest, most efficient way to manage your contractors. You define all the requirements based on your facility's policies and needs – from competency to insurance to infection prevention.

Our web-based solution gives you a "single pane of glass" view of your credentialing program. Equipped with features to help you maintain compliance, like real-time status dashboards, ready-to-run performance and analytic reports, and Global Site Administration for easy multi-facility management.

CHECK OUT THESE BENEFITS:

- **Flexible Credentialing** – Enables you to customize requirements for your contractors based on your facility's specific needs.
- **Easy to Implement** – Web-based means no expensive hardware to purchase or maintain.
- **Global Site Administration** – Easily manage multiple facilities with variable levels of privilege and access rules based on your user profiles.
- **Dashboards** – Get at-a-glance visibility of critical data and real-time compliance status across credential and policy requirements.
- **Analytics & Reports** – Create and run reports and export them quickly for additional data analysis and to demonstrate compliance.
