

Strategy & Planning

Non-profit organizations must evolve and advance in today's swiftly changing environment. DBD Group can help your organization address short-term and long-term goals through our intentional processes to make strategic decisions and plans.

Strategy Sprint

When you need to make an important decision but time is of the essence, DBD Group can help you go further faster. Should you close a location? Absorb a program? Take a right turn in your operating model? DBD's Strategy Sprint is a powerful option to engage key leadership in critical dialogue and decision making when you don't have the time or resources for a full planning process.

Strategic Reboot

In times of rapid change, new contexts, community needs, resources and/or priorities may require you to adjust your strategic plan goals and timelines. A reboot is a practical, efficient approach to revisit a recent or current plan. DBD Group will work with you to refine a vision for impact, check in your current operating model, realign high-level strategies, and identify and implement any changes needed.

Strategic Planning

Strategic planning is a must in times of significant change. DBD's comprehensive process can help you develop a new strategic plan. The process will help you build strategic thinking capacity and navigate a changing climate and increasing demands. We can help you assess the landscape, identify trends and envision the impact you want to create. We will help you define what you do best, outline threats and opportunities, and identify strategies and success measures to get where you want to go. Most important, we will engage your board and staff in a powerfully facilitated process so they rally to implement your vision.

Contact us today!

We're here to assist you in strategy and planning to help you increase your impact.
