

G2 Compass Score™

Make better, faster boarding decisions

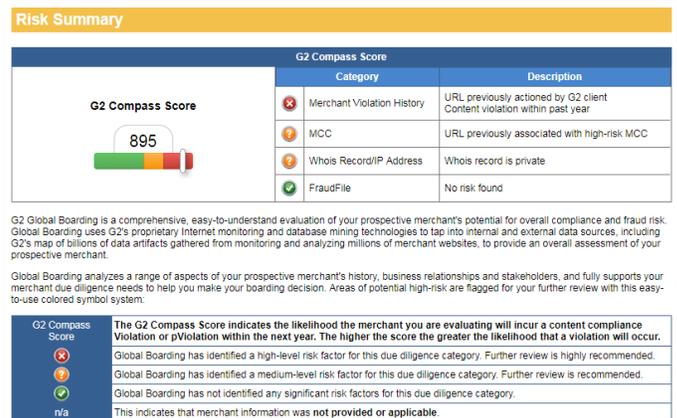

G2 Compass Score offers acquirers, payment service providers, and independent service organizations the ability to grow revenue and mitigate risk, while speeding up their overall merchant due diligence process. By combining 13 years of proprietary G2 data, insights and expertise with a myriad of third-party data sources and billions of data points, G2 Compass Score gives you access to insights deeper than relying solely on identity verification and personal credit scores, or spending time and energy manually reviewing and assessing each merchant.

- 1 Easy Integration**
Using a simple-to-integrate API, you gain access to a real-time risk score based on billions of data points, and displayed in your own system or software application
- 2 API Request**
Once you are integrated, you can easily submit Compass Score Requests automatically, or with the click of a button
- 3 Results**
Based on a scale of 0-1,000, G2 Compass Score makes it clear who to approve, who to decline and who to research further
- 4 Decision: Go/No Go**
The score works with your current underwriting processes to quickly determine whether or not to board a merchant

The Benefits of G2 Compass Score:

- ▶ Board more profitable merchants faster
- ▶ Receive real-time results returned in your own software system or application
- ▶ Make quicker go/no go decisions
- ▶ Access data representing over 80MM merchants from the G2 Merchant Map™

G2 Compass Score, delivered via API (Application Programming Interface), easily integrates into existing systems, workflows and software applications. When used as a “first check” on a merchant, G2 Compass Score can significantly decrease the number of merchants that need enhanced due diligence.
