**Directions for
making a
water bottle
sprinkler:**

Use a push pin.

**Make 5 holes in the water
bottle lid.**

**Fill the bottle with water and cap.
Squeeze the bottle to gently
sprinkle the soil your seeds
are planted in. Keep the soil
moist, not wet.**

**Plan to water at least once daily.
When your plants sprout, be
careful to water gently so
your baby plants don't break.**
