

State of Hawaii Referral List for Providers of Women's Health and Family Planning Services

Patients should be referred to their primary care provider or OB/GYN if they require further care due to contraindications to self-administered contraceptives, preference for long-acting reversible contraception, or the need for routine health screening, pregnancy counselling, or STI screening. If the patient does not currently have a primary care provider, they may be referred to this list of providers for appropriate follow-up care. This list contains women's health and family planning providers at Federally Qualified Health Centers and Title X funded clinics, which offer services on a sliding scale.
