

Front End Engineer

The Role

We are offering an environment to a Front End Engineer, where your experience can make a real difference. The work is challenging, but the collaboration between our teams is what makes it all worthwhile. The Front End Engineer will offer direct input on the architecture and strategy for the modernisation of our current product, whilst also supporting and promoting agile practices especially Agile Scrum.

Working with the product, production and content teams to develop user interface concepts, we are looking for a Front End Engineer to innovate and advocate the use of the latest technologies and technology trends with a focus on performance, compatibility, and security. We make no apologies for the high standards that we set, which is why we need you to create well-organized code ready for contributions from others on the team. This role requires an expert to design and implement applications with support for independent client-side unit testing.

- Direct input on the architecture and strategy
- Develop user interface concepts
- Escalate impediments when appropriate
- Research, test and benchmark
- Design and implement applications
- Support and promote agile practices
- Analyse site and page speed

The Person

You will have a solid understanding of Javascript, and broad knowledge of the web platform as a whole, which must include HTTP, web performance, web security, frameworks. Ideally, you will have a minimum of 6 years experience developing front-end applications and 2+ years of knowledge of using React Native. You are currently working with an agile development team (SCRUM, Kanban, etc) and bring a real drive, energy, and enthusiasm to your work. Your strong written and communication skills will complement your ability to engage in architectural discussions and drive engineering practices towards excellence. You will also have knowledge of semantic markup with HTML5 and CSS3, and a good understanding of at least one of: SCSS, SASS or Styled-Components. Any Ed-Tech experience that you might be able to bring will be advantageous.

- 6/7 Years developing front-end applications using Javascript
- Write clean, comprehensive and scalable code in React Native.
- A solid understanding of front-end architecture
