WE ARE PHP SYSTEMS/DESIGN

AND WE GIVE THE PIPELINE INDUSTRY AN EDGE UP WITH CUSTOM PIPE AND EQUIPMENT SUPPORT SYSTEMS THAT IMPROVE PERFORMANCE AND KEEP YOUR GOALS IN REACH. WITH AN UNRIVALED COMMITMENT TO QUALITY AND SERVICE, WE BUILD LAND SITE AND ROOF TOP SOLUTIONS THAT LEVERAGE TURNKEY STRATEGIES AND PRODUCTS DESIGNED TO SURPASS EXCELLENCE.

STRENGTH, DURABILITY, AND LONGEVITY.

We manufacture equipment using only the highest quality materials, building systems that stand the tests of nature and time, no matter how harsh the conditions. We want our solutions to work for you over the long term, which is why we offer adjustable heights to accommodate grade shifts.

DIRECT ACCESS TO EXPERT DESIGNERS.

We believe the best strategies are built by getting to know our customers and understanding their operations, goals, and objectives. By delivering direct access to expert designers, we build close relationships with customers that enable us to streamline costs and create tailored solutions that deliver results.

UNRIVALED CUSTOMER SERVICE.

We are committed to accountable, responsive service – the kind that builds long-lasting confidence and trust among our customers. There is always a solution, no matter how complex the operation or how quickly service is needed.

ECONOMIC AND EFFECTIVE TURNKEY SOLUTIONS.

With PHP Systems/Design, you aren't getting parts out of a box. We manage everything – from design, manufacturing, and assembly to installation, technical support, and continuing education. You save valuable time while we deliver a more cost-effective, higher quality solution tailored to your operation.

PRODUCTS

Our heavy duty, hot dipped galvanized pipe supports are made to withstand the tests of nature and time. With lightweight – yet highly durable – products that will never rust or decline, we ensure easy and economic installation of solutions to keep labor costs down.

REFINERIES

PIPE SUPPORTS

PHP Pipe Supports are designed to support single or multiple pipes at any specified height or width, with outstanding performance and sustainability, backed by our warranty coverage. The proper selection of supports is critical to the overall performance of the system.

DUCT SUPPORTS

PHP Duct Supports provide both open and closed support design options, with an unsurpassed advantage in sustainability, offering both seismic and high wind applications for safety and reliability.

EQUIPMENT SUPPORTS

The RTU-20 Equipment Supports are designed to support air handlers, blowers, and exhaust fans. Our engineers are able to provide design assistance on many different types of equipment supports.

WALKWAYS AND CROSSOVERS

PHP Walkways and Crossovers are used to access areas that may be obstructed by piping, ducting, or equipment, creating safety and convenience.

CABLE TRAY SUPPORTS

PHP Cable Tray Supports are available in a variety of sizes, are eco-friendly with any roofing system, and can be used on an array of commercial and industrial projects at any specified height or width.

SEISMIC AND HIGH WIND

These demanding applications are specific to a project location in which code requires a licensed PE. Our design team will work with your experts to ensure strict compliance and best design practices throughout the project.

STAIRS AND RAMPS

PHP Stairs and Ramps are designed to access or crossover different levels of equipment that may be out of reach. Each and every component plays an important role in the design process.

PLATFORMS

The PHP Platform is available in designs ranging from compressor stations, service, and pump stations to platforms for equipment and processing facilities. The impact of using PHP Platforms ensures the long-term durability of both the equipment and the service.
