Supplier Portal

Direct Commerce Supplier Portal empowers suppliers to communicate efficiently and electronically, improves management of critical data, and allows greater control of receivables.

The result is lower supplier support costs and reduced cost of ownership.

Our Supplier Portal is a self-service tool that users can access to look up information, query document data, and communicate with you, the buyer. It is a secure web-hosted tool configured to your requirements where events can be tracked and recorded. The portal is the foundation from which you can add additional functionality such as E-Invoicing, Order Management, Discount Management and Dispute Resolution.

Our Portal includes:

- Platform for E-Invoicing, Order Management, Discount Management and more…
- PO, Invoice, and Payment Communication
- Invoice Status Viewing and Searching
- Document History and Tracking
- PO, Invoice, and Payment Searching and Listing
- Pre-defined Searches
- Image, Print and Forward: PDF
- Downloadable Listing Screens
- Configurable Notifications

Supplier Portal, a product of the Direct Commerce® Procure-to-Pay suite of services, provides the platform to automate the P2P process.

The Supplier Portal empowers you to communicate efficiently and creates visibility between all parties.
