

Senior Java Engineer (financial district)

THE ROLE

As the Sr. Java Engineer, you'll act as a lead engineer in our team to build custom software solutions that connect our customers' ERP systems to our SaaS platform. You'll work closely with customers to understand their needs and then write software to handle a large number of transactions. You'll also work to implement new application features and functionality for our customers, and help us solve our challenging engineering problems. Our team works on projects that last anywhere from two to six months; this is a great role for a software engineer who gains energy from working with people and enjoys variety.

Our core technologies include Java, XSL, EJB, JBoss, Oracle, PostgreSQL, Ant, Solaris, Linux.

OUR STACK

- Postgres 9.1, 9.2, 9.3
- CentOS 5.5, 6.3
- JBoss 7.2
- Apache 2
- JDK 1.7

REQUIRED EXPERIENCE & ATTRIBUTES

- 5+ years of software experience in Java & J2EE with experience developing multi-tier enterprise architecture using Java 2, JDBC, etc.
- Strong OOA/OOD concepts: Comfortable with design patterns and best practices and good analytical skills
- Experience developing web based applications and services
- Moderate HTML/CSS/JavaScript skills

DESIRED EXPERIENCE & ATTRIBUTES

- BS/BA, ideally in computer science or a related field.
- Software consulting background
- Familiarity with finance & accounting systems.
- Prior experience in a customer-facing role

ABOUT DIRECT COMMERCE

Direct Commerce is an exciting Software-as-a-Service business that develops and hosts Procure-to-Pay automation solutions for Fortune 500 companies, like The Home Depot, Eli Lilly, Merck and others.
