

What is the best solution for my company right now?

How do I decide what my company's needs are?

Understanding Your Workforce

If you are like most employers, you have no idea how many working caregivers are even in your organization. You could make an educated guess based on recent data but we think it would be much better to know how caregiving is truly impacting your organization, right now.

We walk you through step-by-step to help you better understand your workforce and identify caregivers.

STEP 1

ASSESS

We conduct an assessment of your employee population. This will give you a real time indication of just how many of your employees are caring for a loved one and the impact it is having on absenteeism, productivity and healthcare costs.

STEP 2

OPTIMIZE

We help you create a comprehensive strategy to support the caregivers in your organization and an implementation plan to introduce engaging solutions that create a culture of caring.

STEP 3

CREATE

We look at your current benefit offering and help you optimize what you have and make recommendations on additional offerings to create a culture that supports your caregiving employees.

STEP 4

REPORT

We provide ongoing engagement reporting and work together on analyzing data so you can really see what impact your efforts are having on absenteeism, productivity and other costs.
