

THE FUTURE OF ROBOTICS IS CHANGING

THE RISE OF SERVICE ROBOTS

There is a dramatic shift in the global robotics marketplace. The commonplace use of industrial robots will continue; however, the use of service robots—both personal and professional—will grow exponentially.

MARKET VALUATION

The service robot market is projected to grow from USD 9.01 billion in 2016 to USD 24.1 billion in 2022.¹

SALES

3.7 million

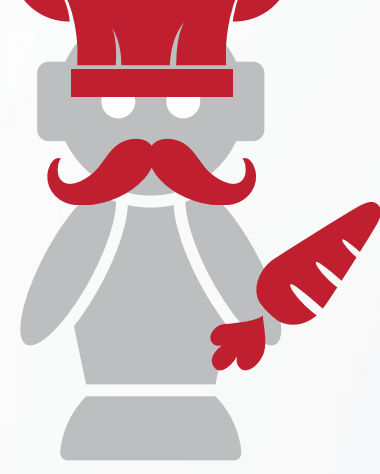

domestic chore robots

were sold in 2015²

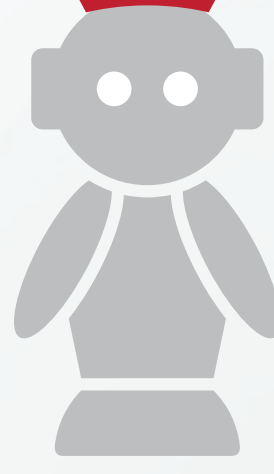

FOOD INDUSTRY

MEDICAL INDUSTRY

92% chance

that food preparation and serving workers will be automated in **20 years**³

Medical robot market will be worth

\$11.4 billion

by **2020**⁴

WORKFORCE

Robots will take **over 30%** of our current jobs by 2025

This includes **both white and blue collar jobs**⁵

Developments in technology will lead to **revolutionary changes** in how we use robots. Desire for customization will cause personal and professional robot use to intersect, causing the intertwining of robots **through all parts of day-to-day life.**

How will the **rapid changes** in robotics change the way you **do business?**

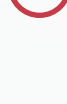

Let's discover how robotics and other technology will impact your organization.
