

# Adding a Simple Search Box to Your Facebook Page

## Adding a Simple Search Box to Your Facebook Page

---

### Things to Know Before Getting Started

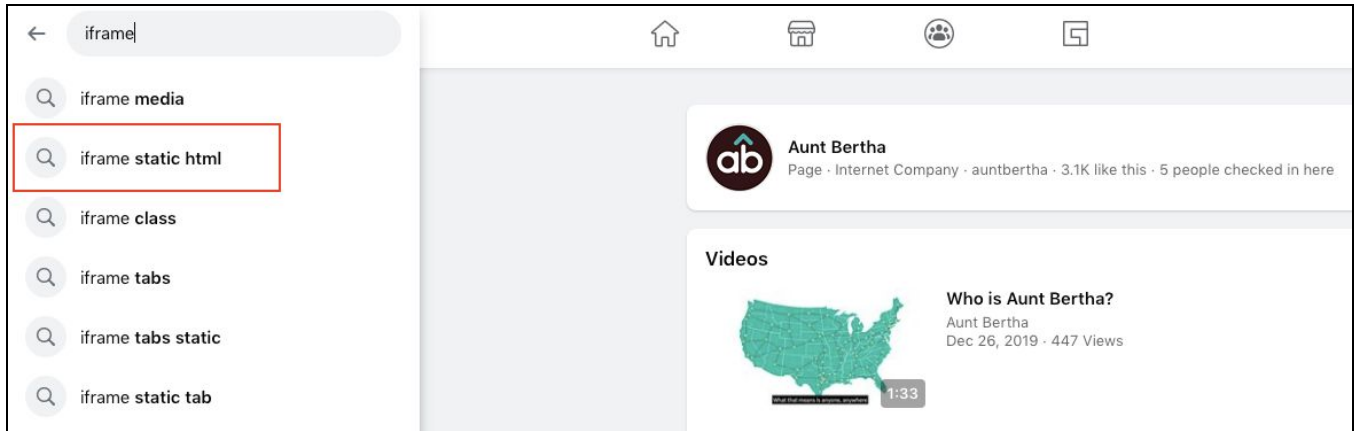

- This feature is *only* available if you have over 2,000 likes on your Facebook Page.
- For all of the below to work properly, you must be an Admin or Editor on the Facebook page.

The screenshot shows the Aunt Bertha Facebook page. The profile picture is the 'ab' logo. The name is 'Aunt Bertha' and the bio is '@auntbertha · Internet Company'. There is a 'Learn More' button and a link to 'auntbertha.com'. The navigation menu includes 'Home', 'Search for Help', 'About', 'Videos', and 'More'. There are buttons for 'Like', 'Message', and a search icon. The main content area features a search box with the text 'Enter your zip code' and a 'SEARCH' button. Below the search box, it says 'Powered by Aunt Bertha'. At the bottom, there is a promotional message: 'Want your community to see this simple search box on your website or Facebook page? It's free and easy to get. Head to [company.auntbertha.com/simple-search](https://company.auntbertha.com/simple-search) and we'll help!'.

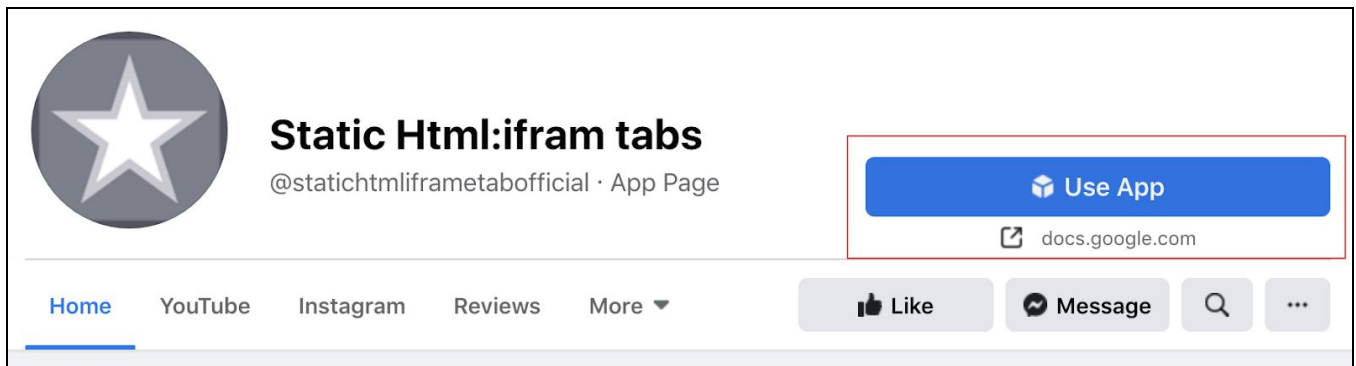

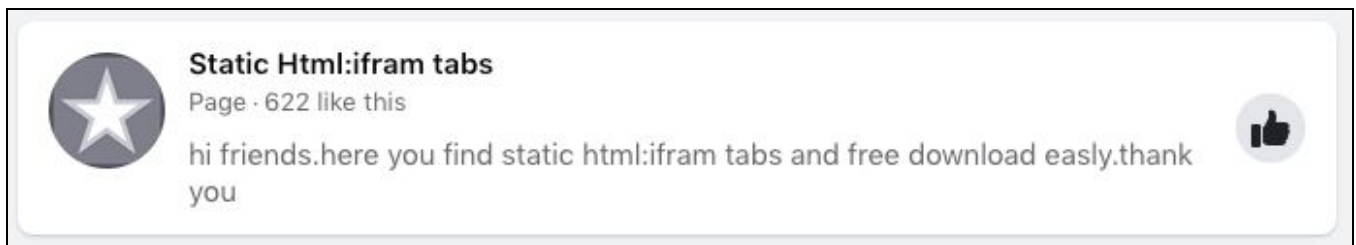

### Step 1: Head to Facebook and type “iframe” in the search box.

There are multiple apps that will do this, but we suggest “Static HTML.”

### Step 2: Click the “Static HTML: iframe tabs” app and select “Use App.”

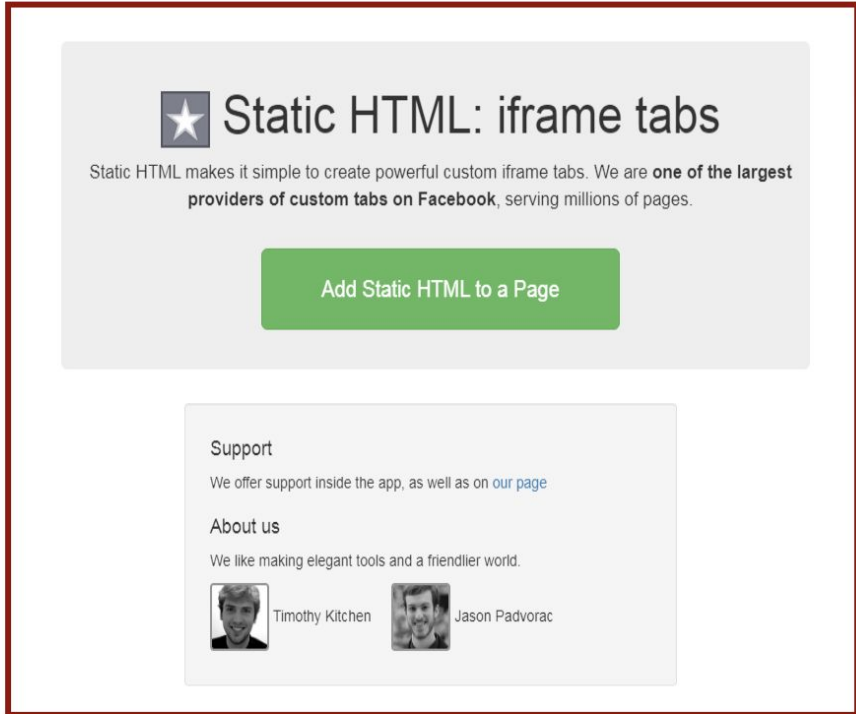

Note: If using a different app, this step may look slightly different.

Step 4a: This will take you to a private Google Doc. Please click on the link to download the application.

The steps here might be slightly different if you chose to download a different app.

## Static HTML iframe tab Application

The screenshot shows the interface for the 'Static HTML: iframe tabs' application. At the top, there is a star icon followed by the title 'Static HTML: iframe tabs'. Below the title, a short description reads: 'Static HTML makes it simple to create powerful custom iframe tabs. We are **one of the largest providers of custom tabs on Facebook**, serving millions of pages.' A prominent green button with the text 'Add Static HTML to a Page' is centered below the description. Underneath, there is a 'Support' section with the text 'We offer support inside the app, as well as on [our page](#)'. This is followed by an 'About us' section with the text 'We like making elegant tools and a friendlier world.' At the bottom of the 'About us' section, there are two profile pictures: one for Timothy Kitchen and one for Jason Padvorac.

### Step 4b: Wait until your app is fully downloaded.

Proceed to copy and paste the code provided to you by our team and add it into the “Content” section.

The screenshot shows the Aunt Bertha content editor interface. At the top left is the Aunt Bertha logo. To the right are links for "Page dashboard", "Change Page", and "View on Facebook". Below the header, there are tabs for "Content", "Leadgate", and "Actions". On the right side of this section are buttons for "Save & Publish", "Enable on mobile devices", and "Preview Q". The main content area shows a "Static HTML" widget with a star icon, a "Change app" button, and an "Embed your website" button. Below this, a code editor shows the HTML code for an iframe and a paragraph of text. The code is as follows:

```
<iframe src="https://www.auntbertha.com/widget/v2/partner/fb?ref=facebook?form_desc=Need+help+Search+free+and+reduced+cost+services+like+medical+care,+food,+housing,+and+more+i n+your+area"width="100%"scrolling="no"frameborder="0" style="padding-top:60px;"></iframe>

<p style="padding-left: 60px; text-align: left;">&nbsp;</p>
<p style="text-align: left; padding-left: 30px;"><span style="font-family: calibri, sans-serif; font-size: 12pt;"><span style="color: #666666;"><strong>Want your community to see this simple search box on your website or Facebook page?</strong> </span><span style="color: #666666;">It's free and easy to get. Head to</span> <a href="https://company.auntbertha.com/simple-search-form/" target="_blank">company.auntbertha.com/simple-search</a>&nbsp;<span style="color: #666666;">and we'll help!</span></span></p>
```

### Step 5: Click Save and Publish to add the Simple search Box to your page

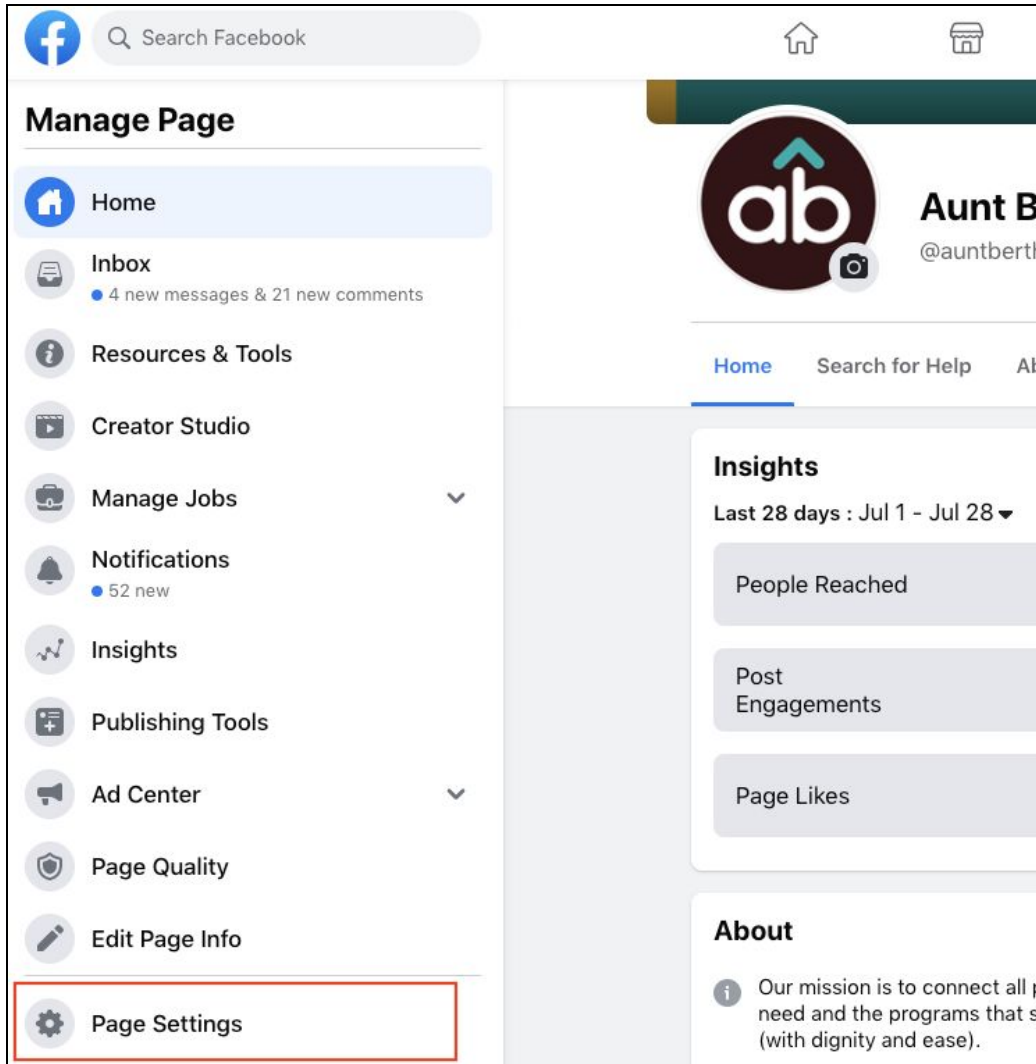

You can also choose “Preview” to review what your Simple Search Box will look like, as well as “Enable on mobile devices” to get a custom, mobile compatible link you can use to share the tab with your Search Box, as Facebook doesn’t automatically enable tabs when viewing pages on a mobile device.

A close-up of the three buttons from the screenshot: "Save & Publish", "Enable on mobile devices", and "Preview Q".

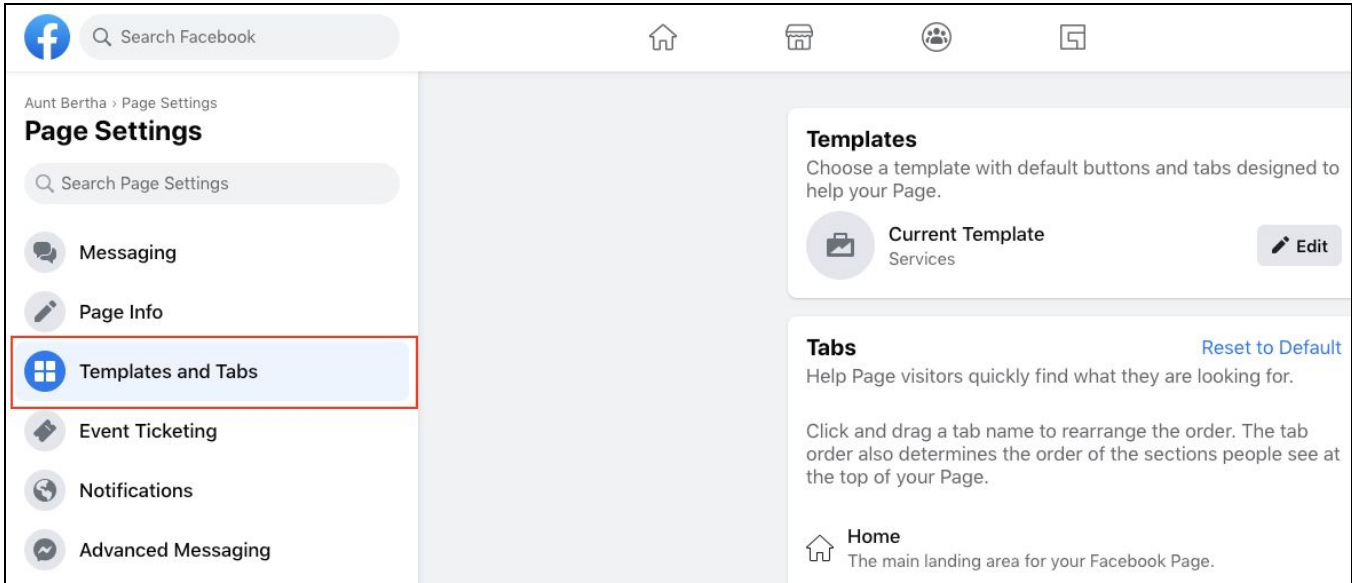

### Step 6a: Change the name of the tab.

Click “Settings” on the Facebook page, to the left of your screen.

**Step 6b: Navigate to the “Templates and Tabs” section.**

**Step 6c: Scroll down until you find the tab you want to edit.**

Select the tab and update the name.
