

Adding a Simple Search Box to Your Facebook Page

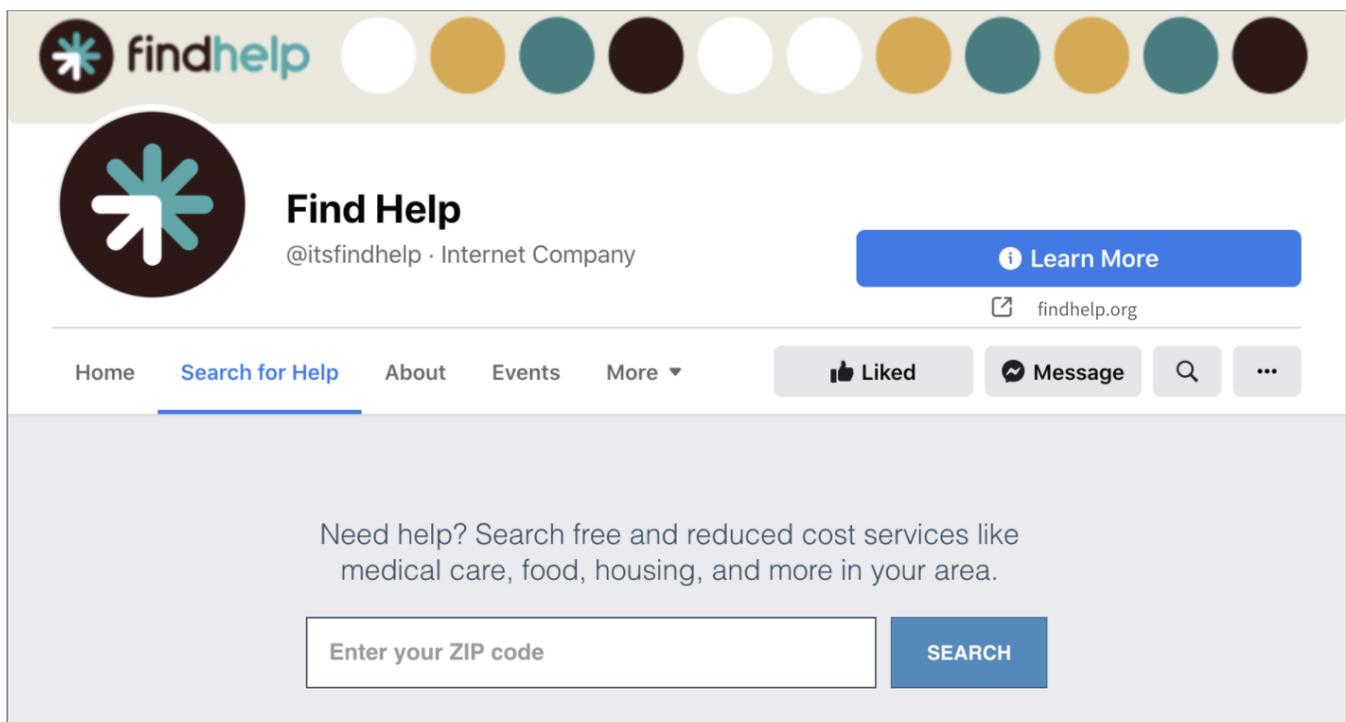

Adding a Simple Search Box to Your Facebook Page

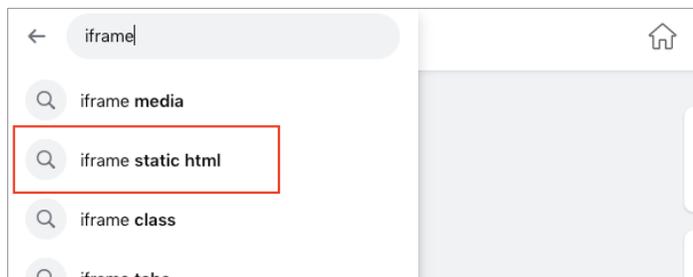

Things to Know Before Getting Started

- This feature is *only* available if you have over 2,000 likes on your Facebook Page.
- For all of the below to work properly, you must be an Admin or Editor on the Facebook page.

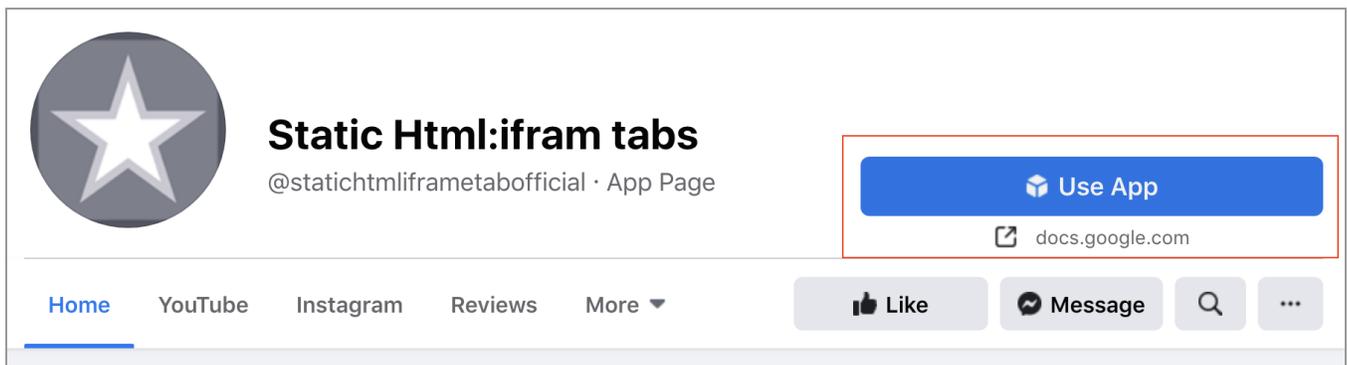

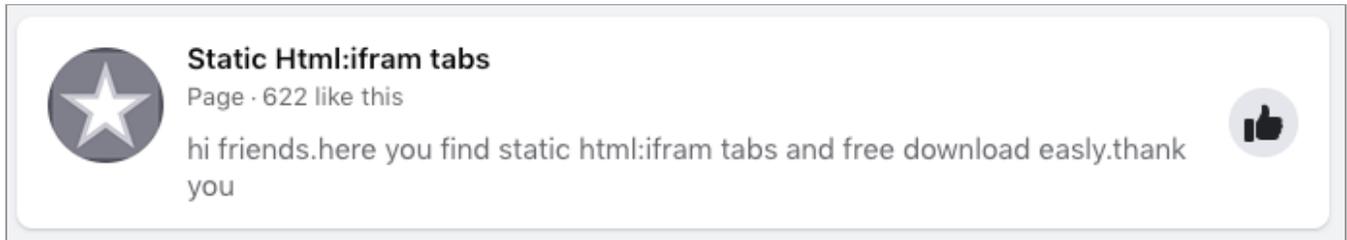

Step 1: Head to Facebook and type “iframe” in the search box.

There are multiple apps that will do this, but we recommend the “Static HTML: iframe tabs” app.

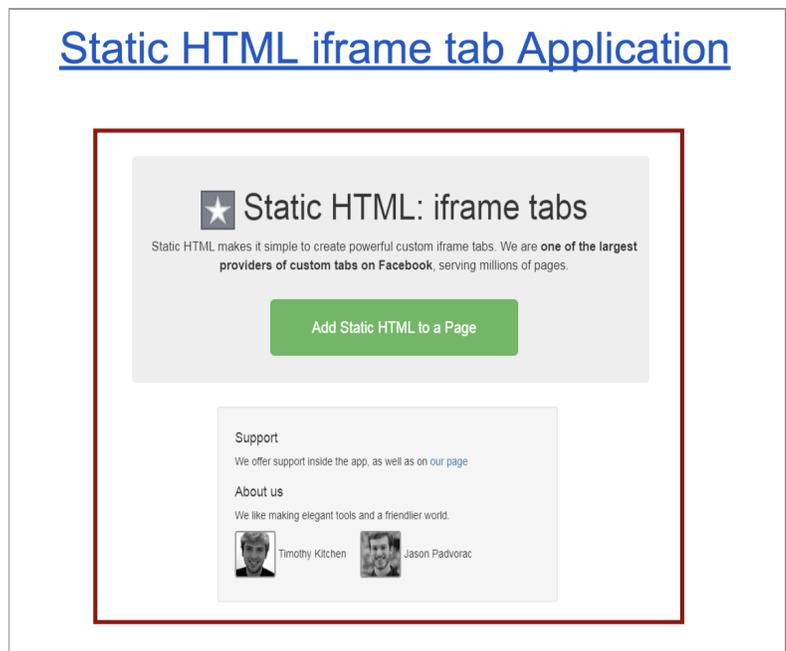

Step 2: Click the “Static HTML: iframe tabs” app and select “Use App.”

Note: If using a different app, this step may look slightly different.

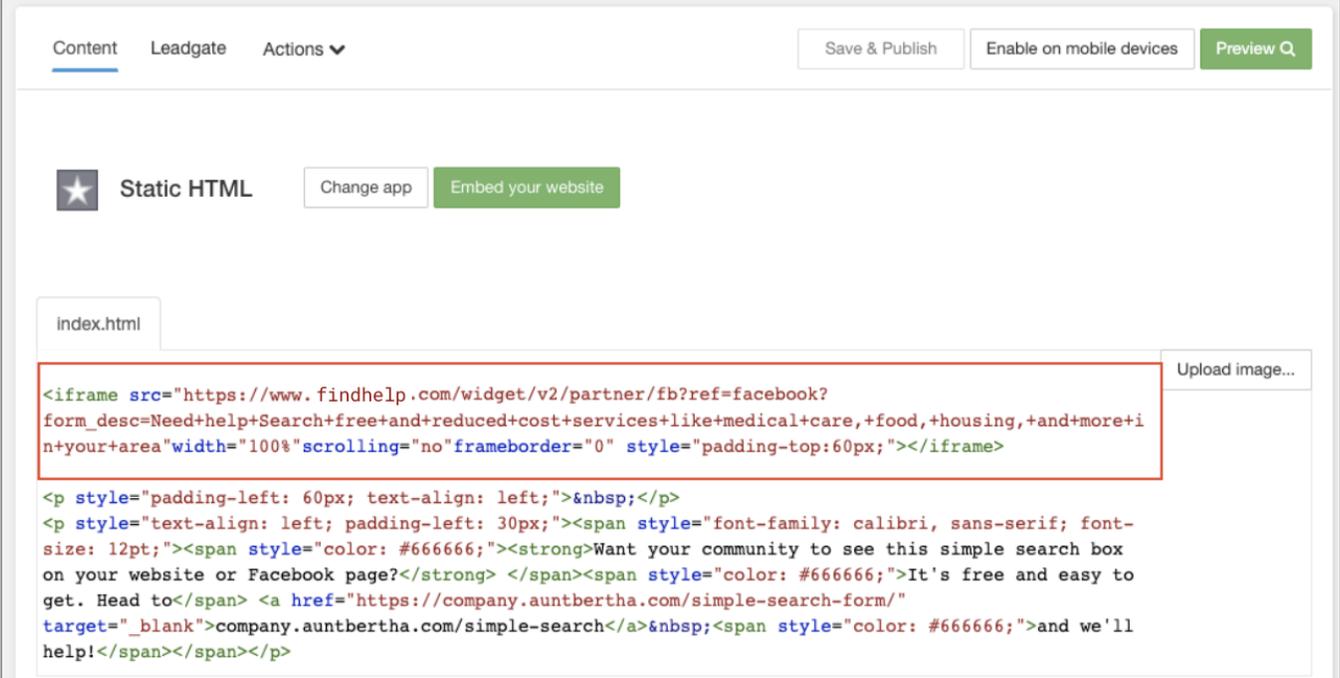

Step 4a: This will take you to a private Google Doc. Click on the link to download the application.

The steps here might be slightly different if you chose to download a different app.

Step 4b: Wait until your app is fully downloaded.

Proceed to copy and paste the code provided to you by your findhelp Customer Success Manager and add it into the “Content” section.

The screenshot shows the findhelp content editor interface. At the top, there are tabs for "Content", "Leadgate", and "Actions". Below the tabs are buttons for "Save & Publish", "Enable on mobile devices", and "Preview Q". The main content area shows a "Static HTML" widget with a star icon. Below the widget name are buttons for "Change app" and "Embed your website". A file named "index.html" is selected. The HTML code is displayed in a text area, with a red box highlighting the `<iframe>` code. The code is as follows:

```
<iframe src="https://www.findhelp.com/widget/v2/partner/fb?ref=facebook?form_desc=Need+help+Search+free+and+reduced+cost+services+like+medical+care,+food,+housing,+and+more+i+n+your+area"width="100%"scrolling="no"frameborder="0" style="padding-top:60px;"></iframe>

<p style="padding-left: 60px; text-align: left;">&nbsp;</p>
<p style="text-align: left; padding-left: 30px;"><span style="font-family: calibri, sans-serif; font-size: 12pt;"><span style="color: #666666;"><strong>Want your community to see this simple search box on your website or Facebook page?</strong> </span><span style="color: #666666;">It's free and easy to get. Head to</span> <a href="https://company.auntbertha.com/simple-search-form/" target="_blank">company.auntbertha.com/simple-search</a>&nbsp;<span style="color: #666666;">and we'll help!</span></span></p>
```

Step 5: Click Save and Publish to add the Simple search Box to your page

You can also choose “Preview” to review what your Simple Search Box will look like, as well as “Enable on mobile devices” to get a custom, mobile compatible link you can use to share the tab with your Search Box, as Facebook doesn’t automatically enable tabs when viewing pages on a mobile device.

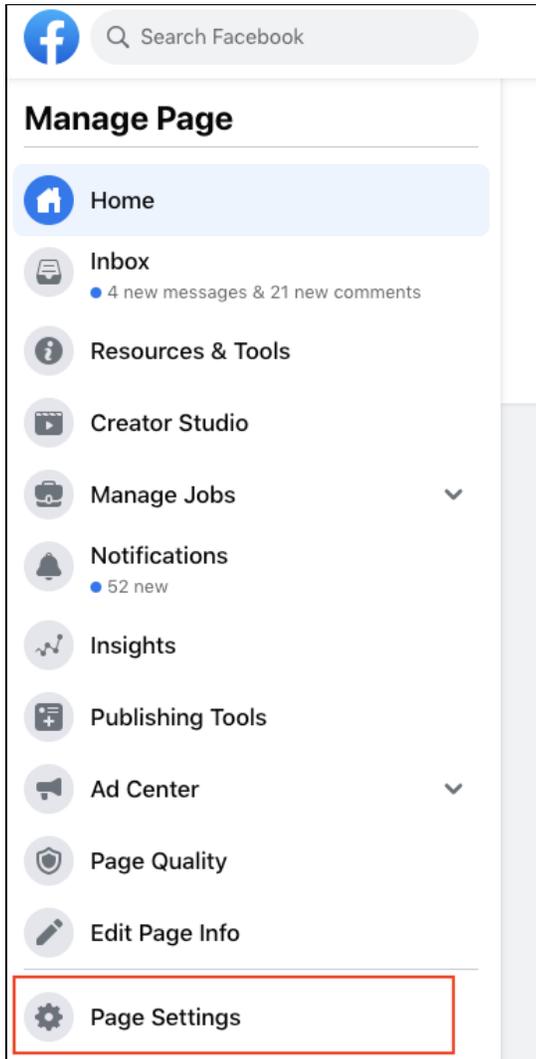

The screenshot shows the findhelp content editor interface with three buttons: "Save & Publish", "Enable on mobile devices", and "Preview Q".

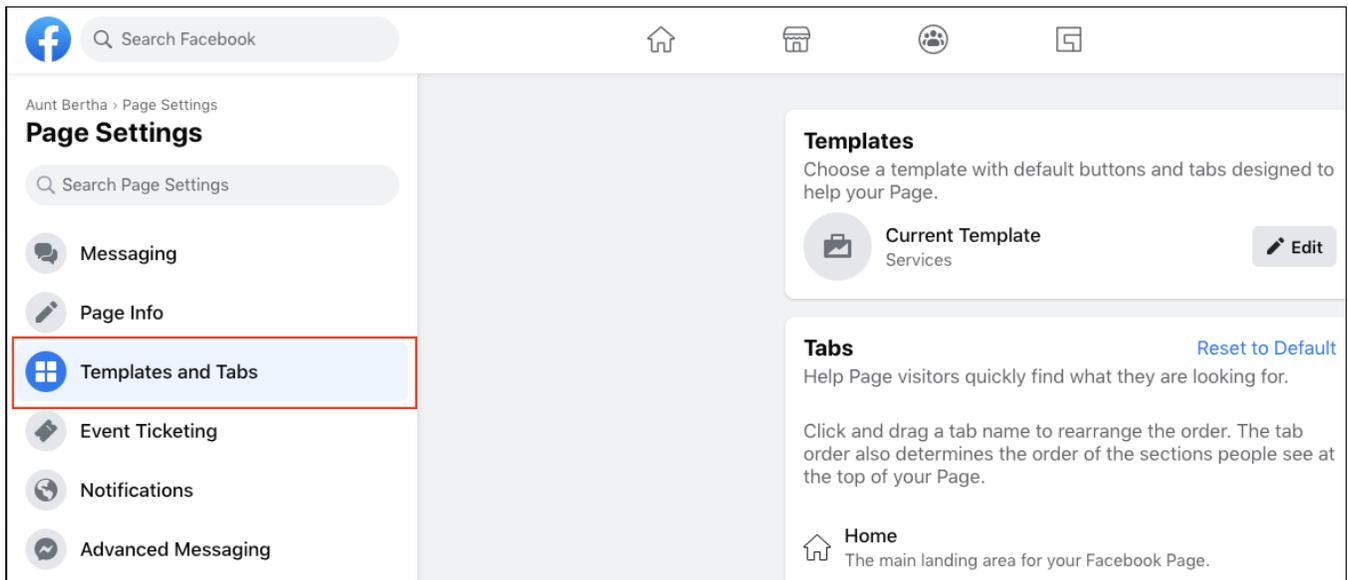

Step 6a: Change the name of the tab.

Click “Page Settings” on the Facebook page, to the left of your screen.

Step 6b: Navigate to the “Templates and Tabs” section.

Step 6c: Scroll down until you find the tab you want to edit.

Select the tab and update the name.
