Un-Installing HighTower Enhancements

The Enhancement Patch Install feature un-installs modules by removing lines of code from your existing Sage MAS 90 or 200 modules, and from programs modified by other Master Developers (unless the Master Developer password protects the Sage Software owned Sage MAS 90 or 200 programs).

NOTE: This guide is solely for HighTower Enhancements from HighTower. If you have other 3rd party software or modifications please refer to the 3rd party master developer uninstall instructions.

Complete the Enhancement Patch Installation

1 Make a backup of your Sage MAS 90 or 200 directory before un-installing applications.

2 From the Library Master Extensions Utilities menu, select Enhancement Patch Install. The following Sage MAS 90 or 200 dialog box appears.

🕂 Sage MAS 90	
2	Please verify that you have current backups before continuing the Patch Installation Program.
	Do you have current valid backups?
	Yes <u>N</u> o

Sage MAS 90 Dialog

3 Click Yes to begin the patch installation. The Enhancement Patch Installation window appears.

Enhancement	Install	
Library Master Extensions		
Gift Cards 4.30		
Direct Deposit 4.30		
MultiBin Advanced Distribution 4.30		
Point of Sale Professional 4.30		
ScanBlaster 4.30		
Time and Billing Professional 4.30		
Time and Billing 4.30		
Timekeeper 4.30		

Enhancement Patch Installation Window

- 4 Select the Installation/Removal option from the Patch options field.
- Select **Removal** to remove any modules.

5 Select the appropriate HighTower module you need to remove from the **Enhancement** field and put the check mark in the corresponding check box.

2	This will permanently remove the data files. Do you want to continue?
	Yes No
Sage MAS 9	0 Dialog

6 Click Yes. The system removes the HighTower Enhancement 7 Close out of the Company Maintenance window.

Removing HighTower Enhancement from the Menu

The HighTower Enhancement will be removed by using the Sage help on Uninstall a Module.

Complete the Uninstall HighTower Enhancement

1. Use either of the following methods to open the System Configuration window:

- On the Administrator Tools screen, click System Configuration.
- Select Library Master Setup Menu > System Configuration.
- 2. In the System Configuration window, click Uninstall.
- 3. In the Uninstall Modules window, select the module to uninstall and click Delete.

The selected **module** is uninstalled.
