

“ AcuVigil identifies the problem before I know I have a problem ”

Phil Wuest, CEO  
Pic-n-Pac Convenience Stores

# The AcuVigil™ Dashboard

CLOUD-BASED WEB PORTAL ▪ NETWORK MONITORING & MANAGEMENT

C-store operations have to split their focus between meeting all the different oil brand technology requirements and keeping every store's Internet connection and all the connected devices up and running. Truck rolls and site visits to repair store technology comes with a cost in operations expenses or lost efficiency.

Acumera's AcuVigil™ Dashboard works with our Merchant Gateway to connect store devices into a single view that is PCI compliant so that you can monitor and troubleshoot your store networks in real-time from a single screen.

- Get real-time network status at the company, store, and device level
- Color-coded monitoring makes it easy to manage every store network pro-actively; each colored square on the status screen represents a location and its status
- Identify network, POS, ATG, and other connected device problems at a glance
- AcuVigil is PCI compliant and maintains a secure view of all your connected devices
- Any color besides green is a signal to investigate the status of connections, devices, and on-site systems at that location

## Benefits

### MANAGE MORE WITH LESS

Operate more efficiently when you can quickly view the status of your entire network from HQ and prevent truck rolls & site visits

### INCREASE UPTIME

Prevent revenue loss by proactively identifying and resolving network, POS, or other device outages and issues before they impact sales

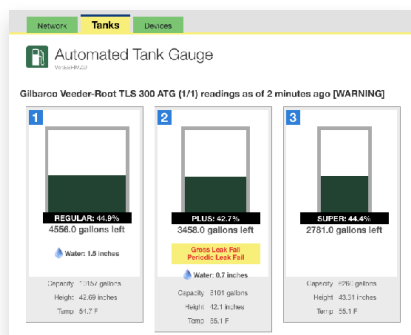

### IMPROVE EFFICIENCY

Save time and focus on generating revenue by easily managing your network, from connectivity to on-site devices and other business systems.

# Your Entire Network in One View

Visible 24 x 7 x 365 to both your IT staff and to the Acumera Network Operations Center (NOC), the AcuVigil™ Dashboard displays real-time network status.

- See the uptime and status history of any location at any time
- See the status of every location in a single view
- Drill down to every registered device at a specific store

- See your current Automatic Tank Gauge (ATG) inventory fuel levels and add alarms and notifications

## Registered Devices (3)

Name	Status	Segment
BackSwitch	Responding	Switch
FrontSwitch	Responding	Switch
POS1	Responding	LAN0
Fusion	Responding	CDE
PINPAD1	Responding	CDE

## Manage More with Apps

The typical C-store manages an average of 25-100 Internet-enabled devices and systems. The AcuVigil Dashboard makes it easy to monitor connected devices from a single screen. Want to connect other store systems for monitoring and troubleshooting? Our app catalog provides secure connections to other in-store systems:

- Remotely manage and control **networking devices**
- **Point-of-Sale (POS)** payment card processor
- Major loyalty systems including ZipLine and FIS
- **PDI** and other accounting systems
- Automatic Tank Gauge (**ATG**) monitoring
- **Back-office PC** connections
- Security **cameras & DVR** systems
- **VPN tunnels** (data encryption) to safeguard information
- PC internal & external scans and other **PCI tools**
- We're always adding more
