

“ Acumera gives us consistent attention to connectivity, security, and visibility of all aspects of retail technology. ”

Patrick Abernathy, Director of IT
Jackson's Food Stores, Inc.

AutoVPN Service

SECURE CONNECTIONS • AUTOMATED VPN SET UP • SELF-HEALING VPNS

Secure and reliable connections between multiple locations and HQ are a must to give management access to critical store information and systems.

Acumera's AutoVPN enables end-to-end connectivity between remote locations and HQ. A single configuration is maintained and serves each site the appropriate settings. Individual sites can be monitored and restarted from the AcuVigil™ Dashboard.

- Site configurations are securely managed from the AcuVigil Dashboard and are available to each location's Acumera Merchant Gateway.
- Use the AcuVigil Dashboard to monitor the status of all your site's VPNs from a single screens.

Benefits

RELIABLE

AutoVPN connections automatically build and rebuild to maximize uptime

SMART

A single, global configuration speeds up VPN provisioning

EFFICIENT

Your staff is more productive because less time is spent troubleshooting VPN connections

Acumera Hardware & Software

ACUMERA MERCHANT GATEWAY

The Acumera Merchant Gateway (AMG) is both a network gateway and a versatile platform that enables proactive store operations and support. With additional software apps the Merchant Gateway eliminates extra networking hardware and directly supports secure automation functions that include:

- VPN Tunnels and VPN monitoring
- Automatic Tank Gauge (ATG) monitoring
- Temperature Gauges
- Back-office PC connections
- Security cameras & DVR systems...and many more devices

ACUVIGIL DASHBOARD

Acumera's AcuVigil™ Dashboard works with our Merchant Gateway to connect store devices into a single view that you can use to monitor and troubleshoot store networks in real-time.

- Color-coded monitoring makes it easy to manage every VPN proactively
- Identify network, POS, ATG, and other connected device problems at a glance
- The AcuVigil Dashboard maintains a secure view of your network and connected devices

Manage More with Apps

THE APP CATALOG

The AutoVPN app is one of many apps accessible in the cloud-enabled AcuVigil Dashboard's App Catalog.

App Catalog

Environment Monitoring Apps

Fuel Apps

Networking Apps

The typical c-store contains an average of 25-100 Internet-enabled devices and systems.

Acumera's framework gives you flexible and secure software defined connections to other in-store systems. These apps help manage and control networked devices and systems:

- **Point-of-Sale (POS)** payment card processor
- Major **loyalty systems** including ZipLine and FIS
- **PDI** and other accounting systems
- Automatic tank gauge (**ATG**) monitoring to integrate with 3rd party fuel providers like Intellifuel, Tanks, PDI Fuel, Pilot, and more
- **Back-office PC** connections
- Security **cameras & DVR** systems
- Internal and external security scans and other **PCI tools to augment and simplify your PCI-compliance activities**

About Acumera

Acumera provides managed network security and network visibility for the payment systems and operations of multi-site businesses. Our clients focus on growing their business by using Acumera's remote systems visibility, strong data security, and simplified compliance services. Since 2002, Acumera has been our clients' trusted network partner.
