# Retail Connections - Standard

CLOUD-MANAGED NETWORK CONNECTIVITY & SECURITY FOR BRANCH RETAIL

Branch retail networks are complex and demand time and focus from your IT team. As multi-site retailers evolve and innovate, network security and management gets more complex. The need for secure, cost-effective, and reliable networks is essential.

Sluggish network performance or outages will frustrate your customers and cost your business sales and frustrate your business stakeholders. Managing a high performing network can get complex fast, and take time away from activities and technologies that drive revenue.

Retail Connections Standard Service from Acumera removes the complexity of network management and monitoring so your team can support tools and technology that delight your customers and drive revenue.

Retail Connections - Standard

Remove the complexity of managing multiple store networks.

CONNECTIVITY
Connect every IoT device (beacons, signage, security cameras, ...) in your store to a single, secure, and flexible platform. Get fast, reliable, and secure site-to-site VPN connections between HQ and your stores for accessing real-time information such as sales, time & attendance, and inventory.

SECURITY
Protect your network from cyberattack. We use the highest NIST-recommended cybersecurity protocols and segment your network to isolate and protect payment information from internal and external threats.

VISIBILITY
The AcuVigil™ Dashboard is our powerful network monitoring dashboard that provides a single view of all your stores and connected devices for proactive troubleshooting from HQ - or anywhere - to prevent truck rolls and site visits.

COMPLIANCE

Our Retail Connections Service secures your payment card environment and supports your PCI compliance efforts. Acumera is a PCI-compliant managed security services provider, our app-enabled PCI tools simplify your compliance burden.

SUPPORT

Our network operations center (NOC) provides 24x7x365 remote monitoring and support for your networks to maintain network uptime and prevent the revenue loss associated with a downed POS or other critical systems.

Components of Retail Connections Service - Standard

Our Cloud-Managed Platform is powered by Acumera's **Merchant Gateway** our advanced firewall hardware, the **AcuVigil™ Dashboard** for unmatched visibility, and our **App Catalog** for fast deployment of new services and stores.

Retail Connections Service gives the busy retail IT department a cost-effective and simplified approach for managing network complexity.
