

“ Acumera gives us consistent attention to connectivity, security, and visibility in all aspects of retail technology. ”

Patrick Abernathy, Director of IT  
Jackson's Food Stores, Inc.

# C-Store Connections - Premium

## NETWORK CONNECTIVITY & SECURITY FOR COMPLEX, MULTI-SITE NETWORKS

Multi-site convenience store operations are complex and demanding. Each day your operations staff must remain vigilant against cybersecurity threats, stay current with the variety of gas brand and POS technology requirements, and make sure all locations are up and running around the clock.

You need a simplified way to monitor and secure your distributed network -- from point-of-sale systems and ATMs, to fuel inventory controls and temperature gauges.

C-Store Connections Premium connects and secures your POS systems, Internet-enabled (IoT) devices, and business systems so that you can maximize uptime across all of your remote sites.

## What you Get with C-Store Connections - Premium

### CONNECTIVITY

Connect every IoT device in your store to a single, secure, and flexible platform. Get secure VPN connections between HQ and your stores for accessing real-time information such as sales, time & attendance, and inventory.

### SECURITY

Protect your network from cyberattack. We use the highest NIST-recommended cybersecurity protocols and segment your network to isolate and protect payment information from external attacks.

### COMPLIANCE

Acumera is a PCI-compliant managed security services provider. We provide all our clients with our Attestation of Compliance (AOC), a roles & responsibilities matrix, and we maintain our compliance on a daily basis.

### VISIBILITY

The AcuVigil™ Dashboard is our powerful network monitoring dashboard that provides a single view of all your connections and connected devices for proactive troubleshooting from HQ - or anywhere - to prevent truck rolls and site visits.

### FUEL MONITORING

Connect your automatic tank gauges to the AcuVigil Dashboard for inventory management. Connect your third party fuel telematics providers to the AcuVigil Dashboard - Intellifuel, Pilot, FuelQuest, FireStream, and more.

## UPTIME

WAN Failover ensures your network uptime with a stable backup connection, so your POS and your entire network are always defended against a network outage.

## BROADBAND MANAGEMENT

Stop dealing with the minutia of managing multiple broadband accounts; let us manage your broadband providers so you can focus your time and resources on growing your business. We handle all your ordering, scheduling, billing, & the break/fix process.

## SUPPORT

Our network operations center (NOC) provides 24x7x365 remote monitoring and support for your networks to maintain network uptime and prevent the revenue loss associated with a downed POS or other critical systems.

# Components of C-Store Connections Service - Premium

Powered by Acumera's Merchant Gateway and AcuVigil™ Dashboard, C-store Connections Premium gives the busy c-store operations team a complete set of network services that simplify the management of distributed store networks. Our services help you improve network uptime across all your sites, so that you can focus your resources on growing your business.
