Managed Firewall Service

PERIMETER FIREWALL • POS AND PAYMENT GATEWAY SECURITY

Convenience store operators face a unique set of requirements by POS vendors and gas brands. When it comes to considering new security technology, they are concerned about the additional time and expense that may be required. However, PCI rules and the constantly changing cyberattack landscape requires that c-stores of all sizes secure their payment network.

C-store operators need a simplified way to monitor and secure their point-of-sale systems that meet their budget, keeps POS breaches at bay, and supports the PCI-DSS firewall requirements.

Acumera's Managed Firewall Service is designed for c-store operators. Our technology is certified by the major point-of-sale vendors and gas brands, and we make installing and monitoring your firewall affordable and easy, so you can focus on running your business.

What You Get with Managed Firewall Service

CONNECTIVITY
Connect your POS and payment gateway to securely to the Internet to process card payments. Our Merchant Gateway is hardened to defend against cyberattacks and sturdy enough for the most challenging back-office environment.

SECURITY
Protect your customers and POS from cyberattack. We use the highest NIST-recommended cybersecurity protocols and segment your network to isolate and protect payment information from external attacks.

COMPLIANCE
Our Managed Firewall Service secures your payment card environment and supports your PCI compliance efforts. Acumera is a PCI-compliant managed security services provider. We provide all our clients with our Attestation of Compliance (AOC) as required by PCI-DSS.

VISIBILITY
The AcuVigil^tm Dashboard is our powerful network monitoring dashboard that provides visibility into your POS connections for proactive monitoring from anywhere.

UPTIME
The Managed Firewall Service comes WAN failover ready, so you have a stable backup connection. Never lose a paying customer when your POS is defended against an Internet outage.

SUPPORT

Our network operations center (NOC) provides 24x7x365 remote monitoring and support for your networks to maintain network uptime and prevent the revenue loss associated with a downed POS.

SAVE TIME & MONEY

We have a simple self-installation process that doesn't require a technical degree to set up. Our support team is always available to guide you through any questions you have. We love giving our clients enterprise-class security and support at a low cost with month-to-month or contract payment options.

Components of Managed Firewall Service

Powered by Acumera's Merchant Gateway our advanced firewall hardware, and the AcuVigil™ Dashboard, Managed Firewall Service gives the busy c-store operator a cost-effective and simplified approach for securing your point-of-sale payment gateway, and your entire network.
