

# BAMBOO

Bamboo is a sustainably sourced eco-friendly fiber, that offers luxurious softness, smooth hand, and flowing gentle drape.

Benefits of Bamboo include:

- Renewable Resource- fast growing, regenerates itself
- Silky, Soft, Shine- round fiber structure reflects sheen and luster; the round surface feels smooth and silky
- Antimicrobial- antimicrobial, antifungal, anti-static and hypoallergenic
- Wearable- strong and durable fiber due to its high abrasion-proof capacity and tenacity
- Insulates- extraordinary water absorption property to stay drier; breathable and helps regulate temperature
