

COOL IN

Cool In produces a tactile sensation of freshness by releasing natural menthol crystals that help regulate the surface temperature according to humidity levels.

Cool In finish made from micro- and nano-capsules containing menthol, was created with the aim of introducing a long-lasting refreshing sensation.

Cool In offers:

- Industry-leading cooling technology
- Long-lasting cooling
- Lowers material temperature
- Accelerated wicking process to keep you dry
- Next-to-skin comfort
