

STA•COOL

FYnesse® Sta•Cool®, is an advanced technology specifically engineered for extreme moisture management. Imagine a technology that can be applied to any combination of polyester deniers, fibers and filament yarns without sacrificing product aesthetics and performance properties.

FYnesse® Sta•Cool® offers fabrics a fresher, softer and noticeably cooler hand. Test after test, it not only moves moisture faster, but keeps you drier and puts comfort first.

Stay Fresh, Stay Dry, Sta•Cool®.
