

Overview

Ships, ferries and barges put a lot of impact on pilings on a daily basis, quickly leading to wear and tear. FiberPILE is constructed using high strength fiberglass material and a resin system that can withstand the most corrosive environments.

Performance Advantages

- High strength
- Superior energy absorption
- Recoverable deflection
- Hollow Construction
- Low Driving Friction
- Dimensionally stable
- Quiet driving acoustics

Long Lasting

- No maintenance
- Corrosion resistant

Features

- Up to 100 feet long
- Can be spliced
- Driving using vibration or impact hammers

Standard Sizes

Outside Diameter (in)	Wall Thickness (in)	Weight (lb/ft)
24"	1"	64
30"	1"	80
36"	1"	97
36"	1.5"	147
48"	2"	247
