Overview
Ships, ferries and barges put a lot of impact on pilings on a daily basis, quickly leading to wear and tear. FiberPILE is constructed using high strength fiberglass material and a resin system that can withstand the most corrosive environments.

Performance Advantages
- High strength
- Superior energy absorption
- Recoverable deflection
- Hollow Construction
- Low Driving Friction
- Dimensionally stable
- Quiet driving acoustics

Long Lasting
- No maintenance
- Corrosion resistant

Features
- Up to 100 feet long
- Can be spliced
- Driving using vibration or impact hammers

Standard Sizes
