AGC Complete Regasketing Service

AGC offers regasketing services for nearly every make and model of plate heat exchanger in use today. Our specially equipped facilities allow us to complete most jobs within a week, and emergency jobs in as little as 24 hours. Our expertise and competitive gasket prices make AGC Factory Regasketing more economical and timely than having your own maintenance people perform the work in-house. In addition, you'll benefit from the peace of mind gained by knowing that every plate has been through our rigorous inspection and dye checking process.

We can manufacture ANY gasket
