

Full stack web developer – FinTech IT Software Company

About EValue

EValue is a young, fast paced, growing FinTech company and the leading UK provider of financial planning and advice technology.

Working with over 80% of large financial institutions in the UK, EValue's white labelled solutions were used by approximately 200,000 consumers and financial advisers in 2017.

We have 70+ talented integrated specialists, working across offices in Newbury and London

The benefits of joining our exciting team

As well as offering fantastic opportunities for career progression, you will be joining a friendly and relaxed working environment where you will be continuously supported and encouraged. We have an open culture where you are encouraged to find and fix problems and not to pass them on to some other team. We're a great environment for makers and builders.

We have fantastic benefits, including

- 25 days annual leave, bank holidays, one extra 'company day' for Christmas plus the option to buy a further five days annual leave
- Generous company pension scheme – up to 10% employer contribution
- Bonus Scheme
- Private medical cover
- Long term disability and Life Insurance
- Study support policy
- Free parking
- A huge range of free hot and cold drinks
- Excellent fully funded company events
- Weekly company football
- Pool/ Table Tennis/ Air Hockey table
- Poker nights
- The opportunity to support local charities through fundraising events

About the role

EValue is recruiting for a Full Stack Web developer with responsibility for the ongoing development, support and maintenance of our market-leading stochastic modelling solutions for the financial services industry.

Would you enjoy taking ownership of the technical design, development, maintenance and implementation of EValue's web applications, both frontend and backend? You will be working hand in hand with Web Designers, Product Owners, Actuarial Testers and the Infrastructure team.

We are looking for an accomplished developer who can deliver robust and performant code on schedule.

Required knowledge and experience

- All of our applications are web based, so we're looking for someone with excellent, demonstrable experience building for the web.
- Solid experience with Javascript frameworks - **ReactJS** is a must.
- **Node JS** - using the **Express Framework**.
- **GraphQL** - knowledge of Apollo a bonus.
- **HTML5, CSS**
- Unit testing in Javascript frameworks (e.g. **Jest** or **Jasmine**)
- A solid working knowledge of **Java**.
- Document databases (**MongoDB** a big plus) and **Mysql**
- **Scrum** and working in Scrum teams.

Desirable knowledge

Experience with any of the following would be very advantageous:

- Automated testing using Cucumber & Selenium
- RESTful web services
- Jenkins, Kubernetes, Openshift(OKD), Docker, AWS
- Redis
- Gulp, NPM, Lerna
- GIT

EValue

- Working with business and product stakeholders to understand and deliver requirements.
- The ability to work with and improve someone else's code just as well as your own.
- Experience in financial services

Qualifications

This is a mid-to-senior position, so we'll be focusing on your experience to date. Most of our developers have a degree in a related field (Computer Science, software engineering, IT, etc), but we hire based on talent and merit.
