

## **Actuarial Configuration Specialist – FinTech IT Software Company**

### **About Us!**

EValue is a young, fast paced, growing FinTech company and the leading UK provider of financial planning and advice technology.

Working with over 80% of large financial institutions in the UK, EValue's white labelled solutions were used by approximately 200,000 consumers and financial advisers in 2017.

We have 70 talented integrated specialists, working across offices in Newbury and London.

### **The benefits of joining our exciting team**

As well as offering fantastic opportunities for career progression once established in your role, you will be joining a friendly and relaxed working environment where you will be continuously supported and encouraged to reach your full potential. We have an open culture where you are encouraged to find and fix problems and not to pass them on to some other team. We're a great environment for makers and builders.

Sound like you?

We have fantastic benefits, including

- 25 days annual leave, bank holidays, one extra 'company day' for Christmas plus the option to buy a further five days annual leave
- Generous company pension scheme – up to 10% employer contribution
- Bonus
- Private medical
- Long term disability and Life Insurance
- Study support policy
- Free parking
- A huge range of free hot and cold drinks
- Excellent fully funded company events
- Monthly osteopath sessions
- Monthly car valeting
- Company football team and Table Tennis team
- Quarterly Poker nights with pizza!
- The opportunity to support local charities through fundraising events organised throughout the year

## The Job

As an Actuarial Configuration Specialist within EValue, you will be responsible for the set-up, testing and support of our stochastic modelling tools, working with senior analysts, consultants and developers to deliver high quality solutions to our clients.

## What you'll be doing

You will be part of the QA Team at EValue and report to the Delivery Manager. Your responsibilities will include:

- Running small client projects with support from more senior members of the team. This will include running Client Acceptance Test windows with direct contact with our clients.
- Functional and numerical system testing of new and existing tools, working with an agile software development framework
- Independent checking of stochastic forecast results
- Test planning and implementation including draft test plans, scenarios and automated testing scripts
- Maintaining and adhering to solid processes and procedures around our testing process
- Mentoring more junior members of the team to ensure they understand the jobs they are required to do, and reviewing their work before sign off from the Delivery Manager.

## Required Knowledge and Experience

### Desirable Experience

- 1+ years' experience in an actuarial or analytical systems based role
- Experience or good working knowledge of Excel
- Experience of working independently with excellent attention to detail
- Experience of communicating with employees outside of your team, particularly those with a different skill set
- Some experience of training or mentoring more junior members of a team

### Qualifications

- A degree in mathematics or a scientific discipline with high mathematical content
- Some actuarial exams would be beneficial
