RAPIDIDENTITY CERTIFICATIONS

Identity Automation provides certification opportunities that help individuals build exceptional careers in the IT security discipline, while enabling organizations to form a skilled and confident staff for Identity and Access Management (IAM) implementations with RapidIdentity. Becoming a Certified RapidIdentity Administrator demonstrates a comprehensive understanding of how RapidIdentity components and modules function and validates an individual has the knowledge and skills to implement and manage RapidIdentity across on-premise, cloud, and hybrid environments.

WHY GET CERTIFIED?

- **Career Opportunities** — Distinguish yourself as a highly-skilled IAM professional with proven experience implementing and managing RapidIdentity.
- **Increased Credibility** — Certification demonstrates you know how RapidIdentity can be leveraged to provide use case solutions for any organization in any industry.
- **Acknowledgement** — As an unbiased barometer of your skills, certification validates credibility and industry expertise with customers and employers alike.
- **Stay Informed** — Certification demonstrates your commitment to continuing professional development and staying ahead of the technology curve.

RECOMMENDED PATH

The recommended approach for becoming a Certified RapidIdentity Administrator is as follows:

1. Study the RapidIdentity product and information resources available to all customers and partners.
2. Take the RapidIdentity training courses.
3. Prepare for certification exam with the RapidIdentity Administrator Certification Study Guide.
4. Schedule and take the RapidIdentity Administrator Certification Exam.

FAQ

Who Should Get Certified?

System Administrators and Support Personnel of RapidIdentity, as well as RapidIdentity system integrators and implementation teams.

Do you have to complete the RapidIdentity Training Courses prior to taking the certification exam?

No. While this is the recommended approach, it is not a requirement. Many customers and partners have been implementing and/or administering RapidIdentity components and modules for quite some time, and may already have the necessary knowledge to pass the exam.

What is the Exam Format?

The RapidIdentity Administrator Certification Exam is offered on-demand as a multiple choice, computer-based online exam that consists of seventy-five (75) multiple choice questions over a ninety (90) minute time period. The exam content includes: RapidAppliance, RapidFederation, RapidConnect, RapidPortal, and general RapidIdentity questions.

What is a passing score?

The exam must be completed with a pass/fail level of 80%, meaning candidates must correctly answer at least 60 of the 75 questions.

How much does it cost to take the exam?

\$100 per attempt.

How Many Times Can the Exam Be Taken?

RapidIdentity Administrator candidates are allowed three attempts to pass the exam during a 12 month period, with a minimum fourteen day waiting period between attempts.

What Types of Questions Are on the Exam?

The exam questions are comprehensive with respect to the latest version of RapidIdentity's components and modules. Included questions involve IAM use cases and critical IAM concepts (e.g. roles, authorization, federation). Upon registration, candidates will receive access to representative exam questions and necessary exam details.
