

# RapidIdentity Foundations Product Training

Installing, configuring, and managing RapidIdentity software is simple once you've mastered the fundamentals. RapidIdentity Foundations introduces the key administration, configuration, and management functions of RapidIdentity and its core components. Upon completion of this course and its exercises, participants will have the skills necessary to manage and support key components of a RapidIdentity implementation.

## COURSE DETAILS

### LOCATION

Courses are taught onsite at the Identity Automation Corporate Office or online via virtual format.

### PREREQUISITES

Basic understanding of Microsoft Active Directory, LDAP, Database Management, Basic Programming and Conditional Logic (e.g. if/else, for, do/while), Computer Networking, Web Services, and Internet Authentication Applications (e.g. SSH, RDP).

Completed RapidIdentity Foundations Pre-Assessment.

### COURSE MATERIALS

Participants will receive access to a pre-configured, cloud hosted virtual environment in Amazon AWS to complete lab exercises.

### FORMAT

Instructor-led with guided hands-on lab exercises.

### WHO SHOULD ATTEND

RapidIdentity Administrators, Partners, and Technical Support staff who wish to learn more about using RapidIdentity to solve identity, data, and access management challenges.

### COST

\$1,500 USD per attendee.
