

## Zfx (Zimmer Biomet) für GenTek

Beim Gedanken an Zahnheilkunde, Implantate und Co. kommt einem wohl kaum der "King" in den Sinn. Mit der Abbildung von Elvis Presley beziehungsweise eines offensichtlichen Imitators im typischen Elvis-Look haben die kreativen Köpfe von Zimmer Biomet den Überraschungseffekt ganz auf ihrer Seite. Und der unterstützt die Botschaft hervorragend: Lieber auf das Original von Zimmer Biomet setzen als auf Fremd-Komponenten.

**Let's be honest: There is nothing like the original!**

**ZIMMER BIOMET**  
**GenTek**  
GENUINE COMPONENTS

Premium implants deserve premium prosthetic components. This is why you should restore your Zimmer Biomet Dental Implants with GenTek, a new portfolio of genuine connection restorative components. Designed to work together, restorations based on GenTek components will be the perfect fit for your Zimmer Biomet Implants, delivering the **physical integrity** and **long-term aesthetics** your patients expect. You can be confident that the quality of a genuine connection is unmatched by any imitator. Zfx™ GenTek™ Restorative Components are available for Zimmer Biomet Dental implant systems **Certain™**, **External Hex™**, **TSV™**, **Trabecular Metal™** and **Eztetic™** as part of an open digital workflow.

**TSV™, Trabecular Metal™ and Eztetic™ Connections**  
Traction Fit Abutment: SEM at 100x magnification displays the microlocking interface in the hexagonal engagement area between the face of the implant and abutment.

**Certain™ Connection**  
SureGrip™ Technology: Provides superior seal integrity through the Implant-Abutment Junction. This is achieved with the combination of the proprietary SureGrip™ brass Certain™ Internal Connection and precision manufacturing.
