1NCE announces technical cooperation with Giesecke+Devrient Mobile Security GmbH

Cologne, 19/09/2019 – 1NCE, the Tier-1 IoT Carrier, and Giesecke+Devrient Mobile Security GmbH, the provider of security technologies, have jointly engaged an extensive cooperation on SIM cards and enhanced SIM card-centric features. The companies are already collaborating across a variety of secure elements including the 1NCE IoT Flex SIM and embedded SIMs. This collaboration will also promote further secure element (SIM)-related innovations. 1NCE brings best-in-class IoT connectivity experience while G+D Mobile Security contributes with its leading security technology for connected devices. The collaboration will see both German-based companies extend their existing SIM card relationship to work co-operatively on further innovative and disruptive IoT offerings.

“We’re excited to announce this partnership with G+D Mobile Security which enables two best-in-class companies to work on future innovations for IoT,” says Alexander P. Sator, the founder and CEO of 1NCE. “We will be one of the top customers of G+D Mobile Security in the IoT market and this chance to collaborate has enormous potential for both of us. We believe this co-operation is unique because 1NCE is one of the companies driving technological innovation with our IoT dedication and focus while G+D Mobile Security is acknowledged globally for its expertise across all realms of security technology.”

Carsten Ahrens, the CEO of G+D Mobile Security, is enthusiastic about the future developments the collaboration aims to enable. “We’re looking forward to exploring the technological opportunities that will emerge from cooperating with a fast-development focused company like 1NCE,” says Ahrens.

1NCE GmbH was founded in January 2018 and started sales in August 2018. Today, the company has more than 50 staff and has sold more than 1 million SIM cards.

About 1NCE:

1NCE is the first fully-fledged IoT network carrier in the world to offer fast, secure and reliable connectivity services at low cost based on an IoT flat rate. This makes IoT applications such as tank maintenance, smart metering or vehicle telematics affordable. The “1NCE in a Lifetime Fee” includes 500 MB data volume, 250 SMS and free access to the 1NCE Connectivity Management Platform via Internet and API. To provide the service, 1NCE cooperates with Deutsche Telekom AG and its roaming partners and supports all common mobile communications standards (2G, 3G, 4G, NB-IoT). In addition to direct sales of IoT mobile connectivity, 1NCE also offers its technology to mobile network operators via a Platform-as-a-Service solution. The company headquartered in Cologne offers its flat rate almost world-wide. 1NCE GmbH was founded in 2017 together with Deutsche Telekom AG and has 60 staff in Cologne, Hamburg, London, Rome, Paris and Riga.
