Wi-Fi Protected Access (WPA)

POWER CONSUMPTION

Low

Medium

TRANSMISSION RATE

1 Mbps

Up to 54 Mbps

Wireless terminals provide merchants with a number of benefits including:

- **MOBILITY.** Enable merchants to better serve the customer and bring the transaction right to the point of service.
- **PRINTED RECEIPT.** Give your servers the capability to print a receipt for the customer even when away from the POS.
- **VARIETY OF PAYMENT OPTIONS.** Provide the ability to accept magstripe, EMV, and NFC payments including the latest mobile wallets.
- **BRAND IMAGE.** Protect yourself from any fraudulent transaction liability, and also safeguard your brand image in the eyes of the consumer.
