Source: 2017 Valify data.

A purchased service is any service contracted for and performed by a third party rather than a hospital's in-house staff. Purchased services touch departments across the entire health system and can be collectively categorized by the following parent categories: Facility Support Services, Clinical Services, Financial Services, IT, Ancillary Services, & HR.

Within these parent categories are over 1,200 unique sub-categories that are essential to gain spend visibility into to the full breadth and scope of purchased services.
