

Application

Designed to achieve minimal clearances of just 3mm between the top edge of the door and underside of the track concealing all moving parts.

Ideally suited to floor to ceiling straight sliding timber doors in both residential and commercial applications.

The smooth track profile can be easily recessed into ceiling to further enhance the clean-lines of the applications.

Single Run Zero Clearance 100 hangers are cast 316 stainless steel with stainless steel bearings and suitable for both interior and exterior applications.

Door Specification

Track System

For Individual Doors:

Max Panel Height

Max Panel Weight

Min Door Thickness

Single Run Zero Clearance 100

3000mm

100kg

32mm

For ease of operation it is recommended that the door width should not exceed 75% of the height of the door. Timber doors for interior use can be flush construction or glazed.
