

Protecting Your Pad FROM TERMITES

BURGESS
PEST MANAGEMENT
PROTECTING YOUR PAD SINCE 1929

SPRING SWARM SEASON TERMITE CHECKLIST

DO YOU SEE

- Translucent wings on floors and near windows
- Live or dead insects near basement sill
- Detached wings, about twice the size of the insect body, fallen on the basement floor
- Swarming/flying insects near windows
- Live insects (white in color) in mulch beds/under stones

Ways to Stay Protected

- P30 Pad Protection Plan.** Covers against termites and 29 other pests 
- Preventative control with **Sentricon** offers guaranteed termites elimination
- Extremely low cost alternative to a curative solution

Termites only swarm one time per year: in the spring. It may be the only time of year, and the only way, to know you have a termite infestation.
