

5

very real benefits of safeguarding your data

For complete protection of your data

www.arkivum.com

1.

100% confidence you can meet regulatory requirements and compliance, even as new requirements are introduced e.g. GDPR's "Right to be forgotten" or Ref2021.

- ✓ Tamper proof
- 📁 Secure export like a digital zip lock bag of evidence
- 📋 Full chain of custody
- 🔍 Encrypts data at rest and in transit
- 📄 ISO 27001 compliant

2.

No data leakage or degradation

- 🔒 100% data integrity guaranteed
- 📁 No need to store local copies
- 🌐 Ready for the future – you never know when you'll need the data

3.

Easily move to cloud or undertake migration projects

- 🕒 Time to convert those tapes at risk of losing data
- 🔧 Modernising data management structure to better support business requirements
- 🔒 Vendor neutral architecture and no data lock-in

4.

Secure data access

- 👤 User based permissions so the right people can access the data they need to support their roles
- 👁️ No unauthorised access

5.

Increased ROI, deliver more for less

- 📄 Optimise storage footprint
- 🌐 Easily handle growing amounts of data without impacting business requirements.
- 📋 Reprioritise resources to work on value add projects rather than basic data management.
- 🔧 Elastically scalable = predictable costs and value

Bonus benefit - once your data is truly safeguarded, you are ready to move on to digital preservation if you want to make sure your data is accessible and usable forever.
