

Introducing ARKIVUM PERPETUA

Digital preservation and long-term data management for Heritage, Higher Education, Libraries and Corporate Archives.

Arkivum Perpetua delivers long-term preservation and safeguarding of some of the world's most prestigious records and collections. Built-in automated processes ensure future accessibility, easy search and usability of your data, making your content discoverable and available over any digital channel.

Archivists

Preserve collections and records for future generations. Make archived collections accessible to provide value to your organisation and community.

Challenges

- Can't access files quickly due to changes in formats and technologies
- Unable to find files needed, resulting in hours wasted
- Lost data - once lost, it's lost forever
- Lack of data management knowledge and expertise for born digital files
- Difficult to collaborate with others and provide controlled access to data
- Unable to make digital assets available to the public, users or community

>>> How Arkivum solves them

- Meets OAIS standards to ensure future access and preservation
- Easy search and added context for more meaningful information
- 100% data integrity guaranteed
- Includes website, email and social media archiving
- Secure user access for easy collaboration
- Arkivum is ISO 27001 certified
- Fully managed service
- Simple data ingest methods

IT

Get your data under control. We future proof and manage your data for you so it is easily searchable, usable and fully compliant. This includes legacy, acquired and proprietary data.

Challenges

- Moving to a cloud environment with minimal risk
- Inability to control where data lives and who accesses it
- Hours wasted on basic data management and control/ access/retention policies
- Growing amounts of data and complexity are increasing data management and storage costs
- Data silos around the organisation
- Lack of specialist resources e.g. for digital preservation requirements

>>> How Arkivum solves them

- Our vendor neutral architecture supports any cloud, on-prem or hybrid environment.
- In-built workflows provide secure, user permissioned access to data.
- Our in-built exit strategy means there is no data lock-in. You own the data at all times and hold the encryption key
- Automated retention and access policies
- Reduce your Total Cost of Ownership (TCO) and bring your data under management
- Remove data silos to create a single source of truth
- Our domain expertise means we adopt industry standards and can recommend suitable best practices

ARKIVUM TECHNOLOGY

Arkivum's modular software delivers long term safeguarding, preservation and usability of your data for as long as you need it.

Arkivum software is powered by industry adopted open source technology, pre-built integrations and open APIs make Arkivum Perpetua seamless when integrating, whether on-premise, cloud-based or hybrid. Arkivum is ISO 27001 certified for best practice information security management.

Data ingest:

Integrate with your existing tools and infrastructure

Flexible APIs

Compliance:

- Smart management of regulated data
- Automate retention schedules
- In-built mechanisms for secure removal of data
- Trusted data export that proves authenticity of records in original state

Usability:

- Extraction and enrichment of metadata for easy search and discovery
- Records can be shared securely
- Make sure your data is where it needs to be with our flexible data organisation model

Digital Preservation:

- Long term access
- Adheres to OAIS standards
- Ongoing file normalisation to ensure always readable

Data Safeguarding:

- Secure, cloud based managed service
- Flexible deployment options
- 100% data integrity guaranteed
- In-built validation, integrity and fixity checks

Visualisation:

"Arkivum can take care of all our data in one place, while giving us the flexibility to deliver it to learners, researchers and staff dispersed across such a huge area".

Ruth Priest

Academic Librarian
University of the Highlands and Islands

"We felt that Arkivum really listened to us and understood what we needed. Our new system will give us all peace of mind. We're having a new physical strong room built at the moment, and I see Arkivum Perpetua as its digital equivalent, giving us confidence that we can preserve a vital part of Jersey's history for decades and centuries to come".

Linda Romeril

Archive and Collections
Director, Jersey Heritage

"Given the vital importance of this decision, we have invested time to research and evaluate to ensure a digital preservation approach that supports flexible and sustainable open source solutions. We are delighted to choose Arkivum Perpetua as it best meets our priority requirements and delivers assurance that our valuable historical data will be preserved and remain accessible today and as it grows over time".

Mark J. Duffy

Executive Director of the
Episcopal Archives

"On behalf of the University, I'm delighted to be leading this innovative new team and am very excited to introduce the Digital Research Team who look forward to working alongside researchers helping them to make the most of digital research opportunities."

Alison Clarke

Director of Digital Research
University of Nottingham

About Arkivum

Arkivum is the trusted software and service partner for long-term data lifecycle management and digital preservation. We serve organisations around the world in data intensive and regulated markets.
