RemoteLOCK™

openEDGE BG

BUSINESS GRADE

The Ideal Smart Lock for Businesses.

RemoteLock's OpenEdge series of smart locks can be remotely controlled and managed from the cloud. RemoteLock's industry-leading SaaS, EdgeState, integrates connected locks into a single point of control.

The **RemoteLock OpenEdge BG** is the perfect solution for medium enterprises, commercial properties, and offices.

This powerful, business grade Wi-Fi smart lock allows users to lock and unlock doors remotely and receive text alerts when codes are used.

Users can also issue new codes, delete existing codes, and provide temporary access to guests, all from a smartphone or computer.

The OpenEdge BG works directly with on-premises Wi-Fi service and doesn't require a third-party gateway or controller.

The OpenEdge BG is perfect for many deployment scenarios, including:

Any enterprise, commercial office, retail operation or property management application, delivering control and the ability to monitor access. The modern, stylish design of the lock is powered by RemoteLock's proven Wi-Fi smart lock technology to deliver enterprise and business grade features.

RemoteLock EdgeState users can manage doors remotely, monitor lock usage, and even receive text or email alerts. Schedules and Lock Groups can be created to provide users with the access they need, only when and where it is needed.

The OpenEdge BG can be integrated with all of RemoteLock's partner integrations to provide robust feature sets and streamlined booking options.

RemoteLock Wi-Fi technology has been embedded into the lock body, making it unlike any other lock on the market. Manage one or thousands of connected smart locks from the EdgeState platform.

Ideal for many scenarios.
