ButterflyMX

No Smartphone? No Problem!

Employees can receive visitor calls on their landline and view messages and door release events from their online account.

ButterflyMX Virtual Keys

Employees, guests or service personnel scan their virtual key at the panel for timed building access. Regular delivery personnel can be assigned a permanent PIN.

Multiple Answering Options

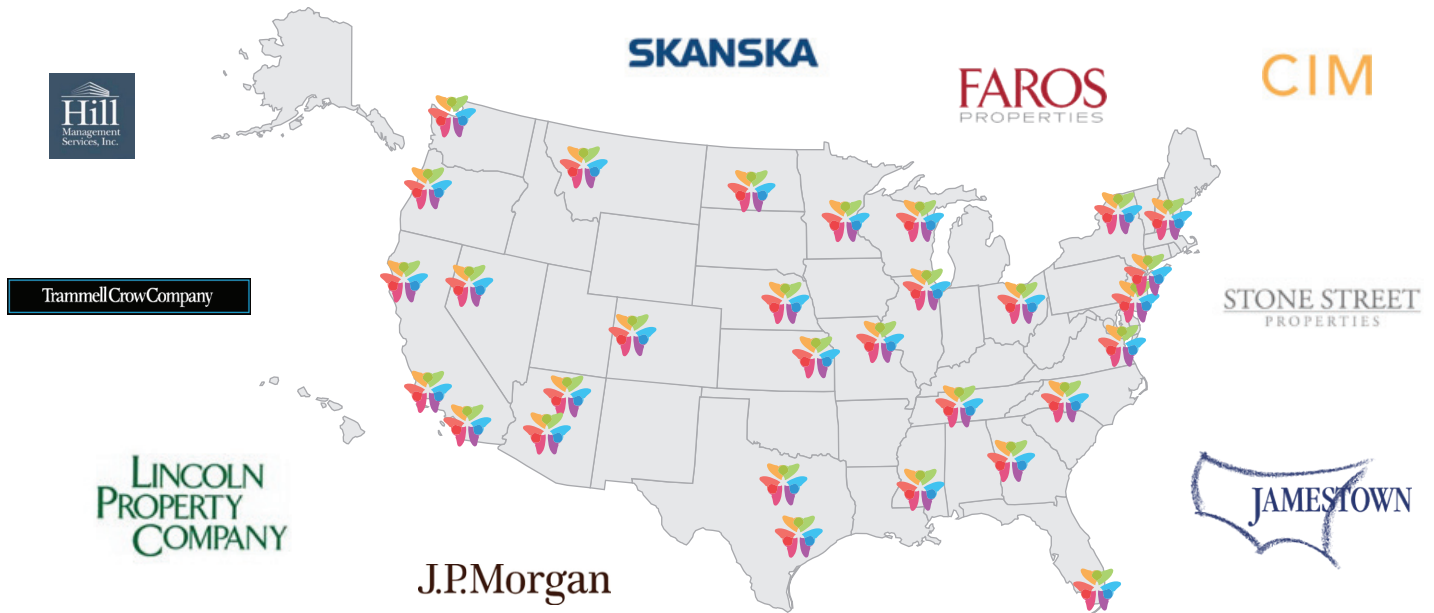

Answer intercom calls at your desk, office phone or on your mobile device. Options to answer are customizable by each tenant.

Robust Customization

The intercom panel display interface is completely customizable. Hot buttons can call a centralized management office from multiple buildings. Tenants can seamlessly manage their employees through the web management portal.

ButterflyMX is proud to contract with these top companies:

Benefits of ButterflyMX for Office Managers, Employees and Commercial Developers

1 Optimal User Experience

Tenants enjoy the convenience of remotely opening the front door entrance from their desk or mobile device.

2 Increased Security

Access reporting with time/date photo stamps of all visitors for each tenant. This provides an additional layer of security for building managers.

3 Low Cost Solution

Future proof, cloud-based storage and remote software maintenance.

4 Plug & Play Installation

Only 4 hours to install and 3 wires needed: power, ethernet, and door release.

5 Transparent Pricing

Cost is calculated based on the building size, not the number of users or doors. This allows building managers a predictable cost structure.
