

## FARM CAMP TRAINING SYLLABUS OVERVIEW

Training at Freight Farms Headquarters is encouraged for all new freight farmers. With a combination of in-farm lessons and classroom sessions, each new farmer leaves feeling confident about getting started. Below you'll find an overview of what you can expect during Farm Camp!

### Crop Selection and Scheduling

Learn all about the most successful crops that people have grown in their LGM as well as some tips for crop planning to optimize your farm production.

### Operating System

Hands-on instruction on how to manipulate the environment in your farm to create the ideal growing conditions for your crops.

### Farmhand®

Instructions and demonstrations on how to use farmhand to remotely monitor and control your farm, track operations and shop for supplies. Available on the web and in the app store.

### Food Safety Tutorials and Best Practices

In-depth instruction on how to keep your farm, food, and customers happy and healthy.

### Maintenance

How to stay on top of cleaning and maintenance of your farm to keep it tuned up and producing at maximum capacity.

### Strategy and Community

A discussion about the role of a farm and farmer in any community, what that means for your farming model, and how to engage your audience.

### Resources and Recap

A review of useful knowledge bases for farmers and next steps after training.
