# ZY ONE LAB

eDISCOVERY
FOR CORPORATIONS & LAW FIRMS

REDUCE LEGAL COSTS, INCREASE EFFICIENCY AND CONTROL YOUR CONTENT

Lawyers and litigation support professionals want solutions to simplify their work and allow them to do more with less. Security officers want to be able to maintain control of corporate data. Many of today's eDiscovery tools are disjointed and require constant manual intervention.

ZyLAB brings end-to-end eDiscovery that provides law firms, corporations and governmental agencies complete control over costs and data security all while providing best-of-breed tools to ensure efficiency throughout the process from data ingestion to production.

Superior ease of use

ZyLAB provides an easy-to-use interface for even the most non-technical personnel. We support browsers, mobile devices and do-it-yourself features such as document upload and automated production.

Scalable, flexible, and secure

ZyLAB ONE clients benefit from the ability to scale their solution as needed, with flexible deployment options including SaaS, on-premises or secure private cloud. ZyLAB as a company is certified ISO 27001.

Constant innovation

ZyLAB ONE is consistently improved in both functionality and performance to keep up with the latest trends in Data Science and eDiscovery.

Collect or upload data & process instantly

Actionable data can be scattered on corporate mail servers, network file services, mobile phones, databases or even social media. ZyLAB eliminates the challenge of finding and collecting data that is responsive to a matter.

Analyze, filter and review

The ability to determine the best legal strategy for any case is based on what data is presented to you, how quickly you can access it and how easily can you consume it. From simple Early Case Assessment to full document review ZyLAB provides a variety of tools to aid with the efficient use of the data involved.

Self-service production

After reducing or even eliminating tedious, manual labor for collecting and reviewing the documents, ZyLAB ONE can assist users with producing the documents in a variety of formats.

Auto-identify sensitive data & auto-redact

While it is critical to make sure all the requested records are collected, it is also key to prevent the inadvertent release of sensitive information. With large data volumes, and scarce time and resources, it is not only time-consuming to review all the records manully, it might be impossible.

ZyLAB ONE provides the ability to not only automatically classify documents based on keywords and/or patterns, but to identify sensitive information and automatically redact as needed.

Data science and visualization

Manual review is time-consuming and expensive. Machine Learning is a proven and defensible approach that speeds up review exponentially while reducing costs and increasing quality. ZyLAB brings a wealth of data science R&D to its intuitive platform.
