

Over the course of my 23 years in cyber security I have recommended very, very few products, but trust me, you will be impressed with this team. ”

Dannie Combs, CISO, Donnelley Financial Solutions, on empow

Donnelley Financial Solutions Case Study

Fast Facts

- » Annual budget: >\$5M
- » Net sales: \$1B a year
- » 10,000 hosts
- » HQ: Chicago, offices and datacenters in Europe and Asia
- » Delivers financial risk and compliance solutions that provide clients with insights that power their decisions and shape global markets.
- » Core security objectives include protecting highly valuable confidential information, ensuring regulatory compliance, and protecting IP.

The Challenges- before empow

- ⊗ Highest level security needs: Donnelley provides services to investment and capital markets for IPO, merger, acquisition, and divestment transactions demanding the most advanced cyber security protection against cyber attackers and insider threats.
- ⊗ Existing SIEM is reactive and doesn't detect advanced attack use cases.
- ⊗ GDPR - global business, with clients and employees all over the world, and offices and datacenters in London and Amsterdam, dictates compliance with strict GDPR regulation.
- ⊗ Slow to respond - lack of automated investigation and attack mitigation.
- ⊗ Lack of visibility and anomaly detection inside the network.

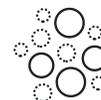

The result: Security is priority #1, and the existing security tools did not deliver.

Donnelley's Requirements:

Proactive Security Analytics

Detection of advanced data-leak scenarios, and internal network visibility and anomaly detection

Reduce Noise

Minimize alerts noise and false positives and reduce burden on security analysts

Automatic Hunting & Mitigation

Cuts down time to response to security incidents

Seamless Integration

Integration into the existing "tool-rich" security infrastructure

Privacy & Regulatory

Meet requirements including GDPR and others

No Maintenance

Minimize maintenance costs and correlation rules

empow's Security Platform - Finally a SIEM that works for you

empow's ROI-positive Security Platform is the first SIEM to autonomously understand attacker intent - based on its patented "mind-reading" AI technology. This intent insight applies to each unit of data that the network infrastructure generates, no matter the source, enabling empow's SIEM solution to determine if there is a real "attack story." If so, the platform's orchestration engine executes optimized adaptive investigation and response actions. In this way empow's Security Platform enables organizations to make more out of the security tools they already have, creating a proactive security ecosystem and improving ROI.

empow is headquartered in Israel with a North American marketing and sales office in Boston. The company was awarded Gartner Cool Vendor in 2017 and other industry awards, for its innovative, AI-based approach to SIEM. empow's customers include leading medium and large enterprises and universities in in North America and Europe.

You've already bought
the right tools.
It's time to use them in
the right way.

empow
You have it in you.

Dannie Combs

CISO, Donnelley Financial Solutions

Are you frustrated with the 10+ years so-called "innovation" within the SIEM technology stack?

Are you demanding PREVENTIVE controls and automated mitigation for 80%+ of known risks with a platform that is flexible enough to fit your unique tech environment?

Are you frustrated with the continuous hype of snake oil solutions that come with offensive pricing models that fail to meet your expectations? Me too....

My recommendation - Call empow's team.
