From

introducing the INTS550-4K touch screen

The INTS550-4K 55 inch touch screen is an intuitive solution that can be used in many different environments such as meeting rooms for video conferencing, team partnerships, whiteboard and high quality interactive presentations. Collaboration has never been so easy, work remotely from anywhere in the world and be instantly connected to your team. Plan your next venture, forecast upcoming budgets, design your next project or inspire your next big idea.

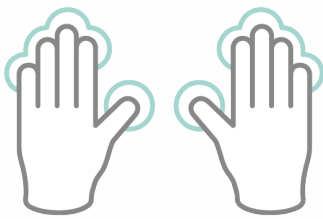

With balanced edge-to-display distance for the perfect appearance in portrait or landscape orientations, this 55 inch 4k touch screen comes with a multitude of features including web browsing, video communication capability and wireless screen sharing. Experience fast and reliable touch performance using the latest 10-point PCAP multi-touch technology. Compatible with Windows multi-touch gestures including pan, pinch and zoom the INTS550-4K touch screen has one of the thinnest screen bezels on the market today. Paired with one of our optional mobile floor stands the INTS550-4K can be transported between office locations with ease.

Never before has it been so easy for teams to collaborate and take performance to the next level. intouchscreens.com.au

4K clarity & multi-touch

View your work and team collaborations on a crisp 4k ultra HD definition touchscreen built with a seamless glass front. Compatible with Windows 10 multi-touch gestures including pan, pinch and zoom.

hardware harmony

Working in complete harmony with so many hardware options our digital video whiteboard will deliver only the very best quality every time.
