

SUGGESTED FORMULA

Flecainide Acetate 20mg/mL in Cherry Syrup

Version number: 1.0

Volume: 100mL

Flecainide Acetate	2gm
Cherry Syrup (C1223)	Q.S. 100mL

SUGGESTED COMPOUNDING PROCEDURES

1. Check calculations and weigh all ingredients.
2. Place Flecainide powder into a mortar
3. Add approximately 2mL of cherry syrup and mix to a uniform paste
4. Add additional cherry syrup in approximately geometric portions almost to volume, mixing thoroughly after each addition
5. Transfer the contents of the mortar to a previously calibrated bottle
6. Add sufficient cherry syrup to bring to volume
7. Shake well and Label
8. Suggested Quality Assessments—follow pharmacy SOPs:
 - a. Weight to Volume calculation
 - b. Color
 - c. Clarity
 - d. Label - auxiliary labels, storage, BUD, compounded medication

Store in air tight amber plastic containers **refrigerated.**

No claims are made as to the safety or efficacy of this preparation. This formulation is provided solely at the unsolicited request of the pharmacist.

Beyond-Use Dates of preparations are conservative estimates by the formulator using reference books, peer-reviewed literature, intended duration of therapy, formulation from commercially available products, organoleptic observations and current USP guidelines. Compounders may have stability studies performed by a reputable laboratory if they wish to extend the Beyond-Use Date. It is recommended that you follow USP <795> recommendations for potency testing.

Beyond-Use Date is estimated to be 60 days when stored Refrigerated per CompoundingToday.com Formula#142

Precautions should be taken to prevent cross-contamination and exposure of ingredients to the compounder and contamination of the preparation by the compounder. Wear appropriate protective equipment. Use safety enclosures (hoods) when weighing and mixing.
