

SUGGESTED FORMULA

Sucrose Octaacetate 1gm/60mL Suspension Enema

Version number: 1.0

Volume or quantity: 60 mL

Sucrose Octaacetate, NF	1 gm
Pluronic Gel 20%	12.5 mL
Preserved Water (Parabens)	QS 60 mL

If pluronic is being stored at room temperature, place in refrigerator for one hour prior to compounding to liquefy.

SUGGESTED COMPOUNDING PROCEDURES

1. Calculate the required quantity of each ingredient for the total amount to be prepared.
2. Accurately weigh and/or measure each ingredient.
3. Transfer sucrose octaacetate to mortar and wet with sufficient amount of liquefied pluronic to make a paste.
4. Slowly add remaining pluronic (and, if necessary, also preserved water) to make pourable.
5. Transfer step 4 to a calibrated beaker, perform three washes of mortar and transfer.
6. Bring step 5 to final volume with preserved water and mix (may use magnetic stir plate/spin bar).
7. Package in 60 mL (2 oz) enema containers and label appropriately.
8. Quality assessments
 - a. Weight to volume calculation
 - b. Color
 - c. Pourability
 - d. Settling
 - e. Resuspendability
- d. Label - auxiliary labels (shake well), storage, BUD, compounded medication

Store in air-tight container, refrigerated.

No claims are made as to the safety or efficacy of this preparation. This formulation is provided solely at the unsolicited request of the pharmacist.

Beyond-Use Dates of preparations are conservative estimates from reference books, peer-reviewed literature, intended duration of therapy, formulation from commercially available products,

organoleptic observations and current USP guidelines. Compounders may have stability studies performed by a reputable laboratory if they wish to extend the Beyond-Use Date. It is recommended that you follow USP <795> recommendations for potency testing.

Beyond-Use Date estimated to be 14 days refrigerated per USP General Chapter <795>

Precautions should be taken to prevent cross-contamination and exposure of ingredients to the compounder and contamination of the preparation by the compounder. Wear appropriate protective equipment. Use safety enclosures (hoods) when weighing and mixing.
