THE RADIANS[®] ADVANTAGE

From ANSI Z87 impact resistant shooting glasses to premium electronic hearing protection to high visibility apparel, Radians safety gear is up for the challenge and meets the required safety regulations and standards.

Radians offers both performance and premium shooting glasses to meet the needs of first-time shooters or professional marksmen who demand the very best. We also carry a wide range of passive and electronic earmuffs and disposable and reusable earplugs.

BECAUSE COMFORT, FIT, AND STYLE MATTER

If it's not comfortable, safety gear may get left behind in the duffel bag. That's why Radians pays special attention to comfort features, such as wire core adjustable nosepieces, vented rubberized nosepieces, padded adjustable headbands on earmuffs, and gun stock cutouts.

RADIANS[®] CAPABILITIES & PROGRAMS GIVE OUR DISTRIBUTORS & RETAILERS THE COMPETITIVE ADVANTAGE

- Fast & economical custom imprinting for personalized branding
- Crossfire retail displays for high-class merchandising of premium safety eyewear
- JUST IN TIME SHIPMENTS. Order in-stock product by 3 p.m. & it ships the same day
- Radians automated warehouse solution increases levels of customer service & satisfaction:
 - Real-time shipping information
 - Expediting same day orders more efficiently

RADIANS[®] PERFORMANCE PROTECTIVE EYEWEAR

Because of our global presence and our culture of safety, Radians tests products to meet or exceed standards, including ANSI Z87.1, MIL-PRF-32432 Ballistic Fragmentation, CSA Z94.3, EN166, and AS/NZS 1337. Consumers can feel confident about Radians products meeting all necessary safety standards and regulations.

KNOW THE DIFFERENCE

*Eyeglasses are **NOT** safety glasses unless both the lenses and frame are in compliance with the specifications for safety eyewear described in the ANSI Z87.1 Standard.*

All Radians[®] and Crossfire[®] eyewear complies with ANSI Z87.1 impact standards, protects against 99.9% of harmful UV rays and includes a hard coat polycarbonate lens to protect against scratches.

POLARIZED LENSES

Radians' polarized lenses prevent glare by filtering out the reflective bent light and glare, resulting in enhanced vision.

XtraClear LENSES

Radians' XtraClear technology provides reduced distortion & enhanced clarity.

STANDARD	IMPACT	CALIBER	PROJECTILE
ANSI Z87 + High Velocity	1500 feet / second 45 meters / second	0.25 inch diameter steel ball (25 caliber)	
MIL-PRF-32432 Ballistic Fragmentation	640-660 feet / second 195 meters / second	0.15 inch diameter steel projectile (15 caliber)	
High Mass Impact	17.6 oz / 50 in height 500 g / 127cm height	17.6 oz / 500 g pointed projectile dropped	

PREMIUM EYE PROTECTION

Crossfire® meets the demand for style and technology. All eyewear features scratch resistant hard coat polycarbonate lenses, 99% UVA/UVB protection from harmful sun exposure and exceeds the industry standards for impact and shatter resistance set forth by ANSI.

These products are tested to the same ANSI Z87.1+ standards for impact and shatter resistance as other Radians® safety glasses but in designs that reflect the most current styles, materials & colors.

Many Crossfire styles are available in amber, clear & smoke lenses, making them perfect for shooting at the range, hunting wild game, working in the workshop or riding ATVs. Regardless the adventure, Crossfire provides superior comfort, fit and protection.

ENHANCED OPTICAL CLARITY

The optically correct portion of the lens blank is pinpointed and marked at the focal point.

DE-CENTERED CUT LENS

The de-centered lens is cut to match the focal point with actual line of sight, ensuring optical clarity.

HD LENS TECHNOLOGY

Crossfire's High Definition (HD) Lens Technology provides enhanced vision by filtering the most damaging blue rays and allowing for less glare and better visual acuity.

DOUBLESHOT™

- Premium shooting eyewear engineered with the shooter in mind
- Patented adjustable wire core nosepiece
- Anti-fog vents
- Anti-reflective & Anti-fog coatings
- XtraClear lenses
- Complies with ANSI Z87.1

HEARING PROTECTION TESTING & STANDARDS

TYPICAL SOUND LEVELS

dB (DECIBEL)

The unit used to express the intensity of sound. The decibel scale is a logarithmic scale in which 0 dB approximates the threshold of hearing in the mid frequencies for young adults and in which the threshold of discomfort is between 85 and 95 dB SPL and the threshold for pain is between 120 and 140 dB SPL.

TESTING & STANDARDS

Radians® earned NVLAP Accreditation to test and certify hearing protective devices (NVLAP Lab # 500090-0). Accreditation, which is issued by the National Institute of Standards and Testing (NIST), allows Radians to perform accredited acoustical testing of hearing protective devices to the ANSI/ASA S3.19 and S12.6 standards. Radians' accredited lab is now a member of a very select group and viewed as a leader in the hearing protection industry.

MADE IN THE USA

American consumers are becoming increasingly aware of the Made in USA labels and the impact they can have on our economy by purchasing American made products. Radians® is increasing the selection of Made in USA products every year. This initiative increases employment in the US, improves speed of replenishment and provides users with the option to 'Buy American,' when choosing personal protection products. The Made in USA range includes foam ear plugs, high visibility and reflective apparel, protective eyewear and lens cleaning accessories.

QUALITY ASSURANCE

The International Organization for Standardization (ISO) 9001:2015 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements. Our ISO 9001:2015 certification reinforces the Radians® commitment to quality assurance and to consistently manufacture and distribute quality personal safety products.

- Full size earcups for extended wear comfort
- Premium adjustable headband
- Special indent designed to prevent gun stock interference
- Compact folding feature
- 2 pairs foam earplugs included for added protection

R-2500 Earmuff: 25 NRR
Deflector Foam Earplug: 33 NRR

Combined Attenuation: 34dB

* When Dual Protection is Used

R2500CS

PART#	DESCRIPTION
R2500CS	R2500™ Passive Earmuff w/ Foam Earplugs

MAXIMUS™

- Full size earcups for extended wear comfort
- Premium padded headband
- 2 pairs foam earplugs included
- * When Dual Protection is Used

Maximus Earmuff: 28 NRR
Deflector Foam Earplug: 33 NRR

Combined Attenuation: 38dB

* **DUAL USE ATTENUATION:** Due to the extreme noise levels produced by firearms, dual protection is recommended for maximum protection. Per the OSHA Technical Manual, attenuation provided by wearing dual protection such as earmuffs with earplugs can be estimated by adding 5dB to the higher of the two product NRR values. For example, with an earplug of 33 dB NRR and an earmuff of 28 dB NRR, combined attenuation can be estimated as 33 dB + 5 dB = 38 dB. Actual attenuation will vary by user.

WOMEN'S SAFETY GEAR

Women are the fastest growing segment of gun owners in the United States. While they enjoy both sport and leisure shooting, many are simply looking at gun ownership as a means of extra security and protection. Increased enrollment in gun safety courses, range use and gun permits for women means more women who want PPE that fits their size and their style while providing maximum comfort and protection.

Competitive champion shooter Shyanne Roberts knows the importance of protecting her hearing and vision when she shoots. That's why she trusts Radians® safety gear for her personal protection needs on the range or at competitive shooting events, where she often takes first place and always makes a splash! Radians applauds Shyanne for her accomplishments over the years and wants to thank her for "growing up on Radians."

WWW.RADIANS.COM

If your work or hobbies involve the outdoors and unpleasant or even dangerously warm conditions, consider the comfort and protection of Arctic Radwear cooling products from Radians. Arctic Radwear products accelerate the evaporative cooling process and provide welcome, and in some cases essential, relief from the heat. Safe and reusable, just soak the product in water the wear for several hours of cooling relief.

HOMEOSTASIS & THERMOREGULATION

We all learned in science class that homeostasis is the self-regulating process by which our bodies maintain stability. One of the most important functions of homeostasis is the regulation of body temperature, which is called thermoregulation. Thermoregulation is the homeostatic process that allows the human body to maintain its core internal temperature of 98.6 degrees Fahrenheit or 37 degrees Celsius. All thermoregulation mechanisms, such as sweating and shivering, are designed to return the body to its internal core temperature.

WHAT IS HEAT STRESS?

Heat stress occurs when the body is no longer able to cool itself by sweating because the surrounding air temperature is close to or exceeds core body temperature. When the body is unable to cool itself by sweating, several heat-induced illnesses can occur, such as heat cramps, heat rashes, heat exhaustion and the often fatal heat stroke.

HEAT INDEX

FIRST AID MEASURES FOR HEAT EXHAUSTION OR STROKE

- Call 911
- Move worker to air conditioned or shady area
- Administer cool water and/or water with electrolytes
- Remove or loosen tight-fitting clothing
- Apply ice packs or wipe forehead, wrists, back, and neck with Arctic Radwear® Cooling Towel. Because these areas are rich with blood vessels next to the skin, cooling them may reduce body temperature.
- Remain with victim until paramedic arrives.

* Please refer to your doctor if any or multiple symptoms arise.
