Full Stack Developer (f/m/x) –
Vienna, Austria or Barcelona, Spain

We are looking for an experienced Full Stack Developer (f/m/x) who has a strong drive for quality of his/her work, is eager to learn and share knowledge within our team and strives for delivering the best solution for our customers on schedule. The successful candidate will work on next generation AI based applications, joining an international Product Development Team in building award-winning AI powered products.

YOUR TASKS

- Develop and improve dockerized web services in Python and TypeScript
- Work together with the architect to design and implement evolutionary architectures
- Collaborate with our frontend development for end-to-end solutions
- Drive and own feature implementation in solutions and components for in-time delivery
- Deliver well-tested web API's using modern best practices
- Work in close collaboration with UI/UX designers

YOUR PROFILE

- Minimum 3 years' experience delivering state-of-the-art applications (e.g. RESTful API)
- Professional experience in mobile development with multi-platform frameworks (e.g. NativeScript, Ionic)
- Knowledge of at least one SPA framework such as Angular.io, React.js or Vue.js
- Understanding of how to champion quality as a continuous effort
- Good communication skills in English

YOUR EXTRAS

- Experience with microservices, k8s, Docker, AWS or Google cloud platform
- Experience in leveraging CI/CD using automation tools like GitLab or similar
- Experience designing and implementing automated system testing suites
- Confident with Linux shell

OUR OFFER

- The opportunity to work in a great team and on exciting AI customer projects
- Chance to grow and expand your skills and expertise in our company
- Flexible working hours and home office options
- Working location in Vienna or in Barcelona
- The stability of a company with 20 years of experience
- Team events, tech talks, free coffee and snacks
- A market conform salary depending on your qualifications and working experience

About Us

Partium offers mobile and stationary parts search & identification solutions within industrial and retail environments. The company was formed by three of the world's leading providers of image recognition and visual search technology: U.S. based Slyce, Spain-based Catchoom and Austria-based Humai.

How to apply
